### **Grange Resources Limited**

ABN 80 009 132 405 and Controlled Entities

### Australia's most experienced magnetite producer

### **FINANCIAL REPORT**

For the Year Ended **31 December 2022** 

### Grange Resources Limited Contents 31 December 2022

#### Directors' report 3 Auditor's independence declaration 23 Consolidated statement of comprehensive income 24 Consolidated statement of financial position 25 Consolidated statement of changes in equity 26 Consolidated statement of cash flows 27 Notes to the consolidated financial statements 28 Directors' declaration 71

### **General information**

The financial statements cover Grange Resources Limited as a Group consisting of Grange Resources Limited and the entities it controlled at the end of, or during, the year. The financial statements are presented in Australian dollars, which is Grange Resources Limited's functional and presentation currency.

Grange Resources Limited is a listed public company limited by shares, incorporated and domiciled in Australia. Its registered office and principal place of business is:

34a Alexander Street, Burnie, Tasmania

Independent auditor's report to the members of Grange Resources Limited

A description of the nature of the Group's operations and its principal activities are included in the directors' report, which is not part of the financial statements.

The financial statements were authorised for issue, in accordance with a resolution of directors, on 24 February 2023. The directors have the power to amend and reissue the financial statements.

72

The directors present their report, together with the financial statements, on the consolidated entity (the 'Group') consisting of Grange Resources Limited ('Grange' or 'the Company') and the entities it controlled at the end of, or during, the year ended 31 December 2022.

#### **Directors**

The following persons were directors of Grange Resources Limited during the whole of the financial year and up to the date of this report, unless otherwise stated:

Michelle Li Chairperson

Yan Jia Non-Executive Director, Deputy Chairperson

Honglin Zhao Executive Director
Michael Dontschuk Non-Executive Director
Ajanth Saverimutto Non-Executive Director

### Information on directors

### Michelle Li, PhD, GAICD

Independent Non-executive Chairperson, Member of the Audit and Risk Committee, Member of the Remuneration and Nomination Committee.

Dr Li has more than 30 years of international mining experience, including senior executive roles with mining companies such as Citic Pacific, Rio Tinto and Iluka Resources.

Dr Li has a PhD from the University of Queensland and was previously a non-executive Director of Ardiden Limited, Orion Metals Limited and Sherwin Iron Limited.

### Yan Jia, GAICD

Non-executive Deputy Chairperson

Ms Jia is currently the Director of the Administration Department with the Jiangsu Shagang International Trade Co Ltd, a subsidiary of Jiangsu Shagang Group, China's largest private steel company. Ms Jia has over ten years' experience of managerial, human resources, intellectual property and commercial experience in the steel industry and bulk raw material transaction sector.

### **Honglin Zhao**

Executive Director, Chief Executive Officer

Mr Zhao is a former Director of Shagang International (Australia) Pty Ltd, former Director and General Manager of Shagang (Australia) Pty Ltd, and former Director of Jiangsu Shagang Group, ultimate shareholder of Shagang International Holdings Limited and China's largest private steel company.

Mr Zhao has over 40 years' experience in the industry and was previously the Commander of Project Development Headquarters with Shagang. Mr Zhao has extensive project management and implementation experience and expertise.

### Michael Dontschuk BSc(Hons), FFTP, GAICD

Independent Non-executive Director, Chairperson of the Audit and Risk Committee, Chairperson of the Remuneration and Nomination Committee

Mr Dontschuk is a finance professional with over 35 years' experience in investment, finance, treasury and financial risk management. He currently is a professional NED and sits on a number of company boards including Eticore, Public Trustee (Tasmania) and Australia Ratings.

Previously Mr Dontschuk has been Group Treasurer of Grange Resources, Group Treasurer of ANZ Bank, Managing Director of Treasury Corporation Victoria, President and Director of the Finance and Treasury Association of Australia and has worked extensively in corporate financial advisory and investment banking including with Oakvale Capital and Bankers Trust.

### Ajanth Saverimutto, BEng (Mining) Hons, BBus (Accounting)

Independent Non-executive Director and Member of the Audit and Risk Committee

Mr Saverimutto is a Mining Engineer and Accountant with over 25 years' experience in the resources industry. Mr Saverimutto has extensive Corporate and Senior Management experience in a number of ASX-listed and private companies. Currently Mr Saverimutto is President and Director of Black Mountain Metals, a private, natural resources company. Mr Saverimutto's previous positions include Managing Director of ASX listed Venturex Resources, Managing Director and Founder of privately held Australian company Salt Lake Mining.

Mr Saverimutto has held senior operational roles including Mining Manager for leading international copper producer Freeport McMoRan (NYSE: FCX), Chief Operating Officer of ASXlisted gold miner Unity Mining and Mining Manager for BHP Billiton – Stainless Steel Materials.

### **Company Secretary**

### Mr Piers Lewis, BComm, CA, AGIA

Mr Lewis has more than 20 years' global corporate experience and is currently the Company Secretary for ASX listed companies Cycliq Group Limited and Ultima United Limited. Mr Lewis also serves as Chairman of Digital Wine Ventures Limited and eSense-Lab Ltd and on the Board of Cycliq Group Limited.

In 2001 Mr Lewis qualified as a Chartered Accountant with Deloitte (Perth) he has extensive and diverse financial and corporate experience from previous senior management roles with Credit Suisse (London), Mizuho International and NAB Capital. Mr Lewis is also a Chartered Company Secretary.

### **Principal activities**

During the period, the principal continuing activities of the Group consisted of the mining, processing and sale of iron ore; and the ongoing exploration, evaluation and development of mineral resources.

### **Dividends**

Dividends paid during the financial year were as follows:

	2022 \$'000	2021 \$'000
Fully franked interim dividend for half year ended 30 June 2022 - 2.0 cents per share	23,147	_
Fully franked final dividend for the year ended 31 December 2021 - 10.0 cents per share	115,734	-
Fully franked special dividend for year ended 31 December 2021 - 10.0 cents per share	-	115,734
Fully franked interim dividend for half year ended 30 June 2021 - 2.0 cents per share	-	23,147
Fully franked final dividend for the year ended 31 December 2020 - 2.0 cents per share		23,147
	138,881	162,028

Since the end of the financial year the directors have recommended the payment of a 2.0 cent per share final dividend of \$23.1 million. This represents a total of \$46.3 million (4.0 cents per share) fully franked dividend for the year-end 31 December 2022. The final dividend was declared NIL conduit foreign income and will be paid on 28 March 2023.

### **Operating and Financial Review**

#### Key Highlights

### Mining operations

- Achieved a major milestone of over 2,110 days Lost Time Injury free.
- Pellet production of 2.52 million tonnes for the year compared to 2.60 million tonnes for the prior year.
- Total iron ore product sales of 2.57 million tonnes for the year compared to 2.62 million tonnes for the prior year.
- Profit after tax of \$171.7 million for the year compared to \$321.6 million for the prior year, on revenues from operations of \$594.6 million compared to \$781.7 million for the prior year.
- Average realised product price (FOB Port Latta) of A\$203.18 per tonne for the year compared to A\$276.17 per tonne for the prior year.
- Unit C1 cash operating costs of \$120.64 per tonne for the year compared to \$99.73 for the prior year.
- Cash and liquid investments of \$298.6 million at the end of year compared to \$463.5 million at the end of the prior year.
   Decrease largely due to payment of dividends.

### Safety performance

A focus on safety has been maintained across the business with over 2,110 days Lost Time Injury Free achieved.

Key revenue metrics for the year ended 31 December 2022 and the preceding 2021 year were as follows:

	2022	2021
Iron Ore Pellet Sales (dmt) Iron Ore Concentrate Sales (dmt) Iron Ore Chip Sales (dmt)	2,429,700 1,853 136,760	2,507,201 42 108,130
Total Iron Ore Product Sales (dmt)	2,568,313	2,615,373
Average Realised Product Price (US\$/t FOB Port Latta)*	141.28	208.08
Average Realised Exchange Rate (AUD:USD)	0.6953	0.7535
Average Realised Product Price (A\$/t FOB Port Latta)	203.18	276.17

<sup>\*</sup>adusted for the costs of freight and final pricing settlements on provisional settlements as per sales agreements. Pricing is typically finalised in one to three months after shipment month.

Total sales for the year ended 31 December 2022 was 2.57 million tonnes of high quality, low impurity iron ore products (2021: 2.62 million tonnes) and reflects sustained production from maintaining access to high grade ore.

The average iron ore product price received during the year was \$203.18 per tonne of product sold (FOB Port Latta) (2021: \$276.17 per tonne).

Please refer to Note 4 of the Financial Report for segment information for sales to different geographical markets. The sales from long term off take agreements with Jiangsu Shagang International Trade Co. Ltd represents 36.5% of total sales for 2022 (2021: 27.7%).

Key operating metrics for the year ended 31 December 2022 and the preceding 2021 year were as follows:

	2022	2021
Total BCM Mined Total Ore BCM* Concentrate Produced (t)	15,466,534 1,280,501 2,624,865	13,667,044 2,804,234 2,559,987
Weight Recovery (%)	45.2	44.4
Pellets Produced (t) Pellets Stockpile (t)	2,518,232 298,725	2,597,428 210,193
"C1" Operating Cost (A\$/t Concentrate Produced)	120.64	99.73

<sup>\*</sup>Mining activities have focused on waste stripping in both North Pit and Centre Pit in 2022.

Note: "C1" costs are the cash costs associated with producing iron ore products without allowance for mine development, deferred stripping and stockpile movements, and also excludes royalties, sustaining capital, depreciation and amortisation costs.

Mining activities have focused on the cutbacks in both North Pit and Centre Pit, following the successful completion of North Pit Stage 6. This ore mining stage yielded large stockpiles to support production in 2022 and 2023. Mining movement improved significantly over the later part of the year with completion of some repairs to the truck fleet and the implementation of modifications to the haul network. The new Caterpillar 6040 face shovel is working well and six second-hand Caterpillar 789 trucks have been introduced to the fleet to support production. The rebuild of the current fleet also continues with mechanical overhauls on six trucks completed during the year. Additional replacement equipment is scheduled for delivery in Q1, 2023.

### North Pit Underground Development Project

The North Pit Underground PFS previously demonstrated a technically and economical feasible underground mining operation for North Pit. Ore continuity was demonstrated at depth and highlights the potential for 6 million tonne per annum production rate with an underground mine life of more than 10 years. The Definitive Feasibility Study was commenced in 2022, with an amendment to the location of the extraction level being modelled after the completion of North Pit Stage 7 open pit mining. Additional drilling to the north, revisions to geotechnical models were completed and further exploration is planned as part of the DFS in 2023.

### **Port Latta Improvement Projects**

The redesigned Furnace Line 4 was commissioned in 2022. The initial phase involved integration into the operation with completion of the refractory rebuild. The next phase will be to commission the intermediate air system which will allow the improvement of air distribution through the furnace, and is scheduled for Q2, 2023. This will inform future design modifications to the other furnace lines and support Grange's decarbonisation initiatives.

### Financial Position

Grange's net assets increased during the year to \$904.1 million (31 December 2021: \$871.2 million). The key movements in net assets during the year are a result of the following:

- An increase in property plant and equipment and mine properties and development of \$60.6 million and \$98.6 million respectively.
- An increase in other financial assets of \$170.6 million due to investment in term deposits
- An increase in trade receivables by \$34.3 million
- A decrease in income tax payable by \$62.9 million
- A decrease in cash and cash equivalents of \$335.5 million (refer to statement of cashflow) and
- A decrease in net deferred tax assets by \$60.9 million.

#### Statement of Cash Flows

#### Net cash flows from operating activities

Net cash inflows from operating activities for the year were \$196.9 million (2021: inflows \$498.2 million) due to lower prices compared to previous year and increase in unit operating costs.

### Net cash flows from investing activities

Net cash outflows from investing activities for the period were \$396.2 million (2021: outflows \$79.6 million) and principally related to funds invested in term deposits of \$191.2 million and expenditures for mine properties and development of \$136.8 million and property, plant and equipment of \$87.7 million.

#### Net cash flows from financing activities

Net cash outflows from financing activities for the period were \$145.6 million (2021 outflow: \$165.3 million) and principally related to the payment of 2021 final dividend (\$115.7 million) and 2022 interim dividend (\$23.1 million).

### **ESG** Reporting and Initiatives

Grange published its baseline Environmental, Social, and Governance (ESG) report with disclosures on 21 core metrics set by the World Economic Forum (WEF) in its standardised and globally recognised Stakeholder Capitalism Metrics ESG framework.

This new global environment is challenging the traditional expectations of corporations and redirecting investment capital. Grange is committed to aligning the business, where applicable, to the sustainable development goals that provide a roadmap to sustainability and resilience.

The baseline report demonstrates Grange's commitment to aligning the business, where applicable, to the sustainable development goals to provide guidance to sustainability and resilience. The report describes the progress Grange has made against the four pillars of the framework for Governance, Planet, People and Prosperity.

Most notably, Grange has developed a road map to reduce emissions. This will involve the reduction in energy used per tonne of product; upgrades to furnaces; recovery of heat in the pellet plant; application of technology and electric vehicles in the mining operation; and alternative fuel sources.

The Board has endorsed the pursuit of decarbonisation of Grange's Business with specific targets for CO2-e reduction including:

- The elimination of non-renewable coal sources like anthracite, by 2025.
- CO2-e emission target reduction of 50% by 2030 reducing emissions to 53kg of CO2-e per tonne of iron ore products.
- Target of net zero CO2-e (Scope 1 and 2) emissions by 2035

### **Southdown Magnetite Project**

The Southdown Magnetite Project, situated 90km from the city of Albany in Western Australia, is a joint venture between Grange (70%) and SRT Australia Pty Ltd (SRTA) (30%). SRTA is jointly owned by Sojitz Corporation and Kobe Steel. This advanced project has 1.2 billion tonnes of high quality resource and has access to established infrastructure.

In December 2022, the Company entered into a binding agreement with its joint venture partner, SRT Australia Pty Ltd to reacquire SRT's 30 per cent interest in the Southdown Magnetite Project. The transaction is expected to be completed in Q1, 2023. Upon completion, Grange will hold 100 per cent ownership in the Project.

During 2022, the Company commenced to carry out a definitive feasibility study on a 5 Mtpa development case with new technology and additional testwork. The study is progressing as planned and the results will be released when completed at the end of March.

All tenements, permits and project assets continue to be maintained in good order.

### Significant changes in the state of affairs

There were no significant changes in the state of affairs of the Group during the financial year.

There was no significant change in the state of affairs of the Group that occurred during the year ended 31 December 2022. Commentary on the overall state of affairs of the Group is set out in the Operating and Financial Review.

There were no other significant changes in the state of affairs of the Group during the financial year.

### Matters subsequent to the end of the financial year

Since the end of the financial year the directors have recommended the payment of a 2.0 cent per share final dividend of \$23.1 million.

There were no other matters or circumstances arising since 31 December 2022 that has significantly affected, or may significantly affect:

- i) The Group's operations in future years; or
- ii) The results of those operations in future financial years; or
- iii) The Group's state of affairs in future financial years.

### Likely developments and expected results of operations

Grange's strategic focus is to generate shareholder value by safely producing high quality iron ore products from its Savage River and Port Latta operations in Tasmania and continuing to assess the feasibility of a major iron ore development project at Southdown, near Albany in Western Australia. The Group's current strategic priorities include:

### Savage River and Port Latta Operations

- Optimising the Life of Mine Plan together with cost reduction strategies
- Completing the Definitive Feasibility Study for underground mining in North Pit
- Producing high grade ore from Centre Pit
- Delivering on secured off take agreements
- Maintaining access to ore with continuing investment in mine development
- Maintaining critical process infrastructure
- Continuing focus on improving productivity and implementing cost control projects

### Southdown Project

- Completing feasibility study on a 5 Mtpa development case with new technology and additional testwork
- Ensuring that all tenements, permits and project assets remain in good standing

### Risk Management

The Group continues to assess and manage various business risks that could impact the Group's operating and financial performance and its ability to successfully deliver strategic priorities including:

- Fluctuations in iron ore market and movements in foreign exchange rates
- Volatility in the energy prices and availability
- Geotechnical risks including wall stability
- Production risks and costs associated with aging infrastructure
- Project evaluation and development
- Health, safety and environment
- Impacts of climate change on our business
- Risks associated with underground mining

Risk mitigation strategies include the following:

- Optimise timing of sales to the fluctuations in iron ore prices and demands from different markets
- Focussed program of geotechnical wall monitoring, modelling and redesign work to mitigate potential stability issues
- Continue disciplined and rigorous review process regarding budget development and cost control to ensure investment directed to highest priority areas while reducing overall operating costs
- Hedging strategies for key energy exposures
- A well developed tool kit to ensure projects are adequately planned and peer reviewed prior to commitment and execution
- Outstanding safety record is supported by comprehensive safety system that enables management to develop a resilient safety culture and ensure our stewardship over the environment
- Initiatives to progressively decarbonise the operation

### **Environmental regulation**

The mining and exploration tenements held by the Group contain environmental requirements and conditions that the Group must comply with in the course of normal operations. These conditions and regulations cover the management of the storage of hazardous materials and rehabilitation of mine sites.

The Group is subject to significant environmental legislation and regulation in respect of its mining, processing and exploration activities as set out below:

### Savage River and Port Latta Operations

The Group obtained approvals to operate in 1996 and 1997 under the Land Use Planning and Approvals Act (LUPA) and the Environmental Management and Pollution Control Act (EMPCA) as well as the Goldamere Act and Mineral Resources Development Act. The land use permit conditions for Savage River and Port Latta are contained in Environmental Protection Notices 248/2 and 302/2 respectively. The currently approved Environmental Management Plans were submitted for Savage River and Port Latta on 21 December 2010. The extension of the project's life was approved by the Department of Tourism, Arts and the Environment on 12 March 2007 and together with the Goldamere Act and the Environmental Protection Notices, is the basis for the management of all environmental aspects of the mining leases. The Group has been relieved of any environmental obligation in relation to contamination, pollutants or pollution caused by operations prior to the date of the Goldamere Agreement (December 1996). Grange received planning approval from the Waratah Wynyard Council and the Tasmanian Environment Protection Authority for the Centre Pit Expansion and South Deposit Backfill Dump through DA 216/2021 and Permit Conditions-Environmental No. 10995

During the financial year there were no breaches of licence conditions.

### Southdown Joint Venture

The Southdown Joint Venture has not been responsible for any activities which would cause a breach of environmental legislation.

#### Mount Windsor Joint Venture

Grange is a minority partner (30%) in the Mt Windsor project in North Queensland which is now being rehabilitated for future lease relinquishment. An ongoing Transitional Environment Program has been entered into voluntarily to identify and remediate various sources of pollution on site. A comprehensive plan has been developed and instigated to manage the leases with relinquishment expected in 2045.

During the financial year there were no breaches of licence conditions.

### National Greenhouse and Energy Reporting Act 2007

The National Greenhouse and Energy Reporting Act 2007 requires the Group to report its annual greenhouse gas emissions and energy use by 31 October each year. The Group has implemented systems and processes for the collection and calculation of the data required and has submitted its annual reports through the Emissions and Energy Reporting System (EERS) by 31 October each year.

National Greenhouse and Energy Reporting (Safeguard Mechanism) Rule 2015

The Safeguard Mechanism applies to designated large facilities and is triggered when the facility exceeds 100,000 t CO2-e as per Division 8 of NEGR (Safeguard Mechanism) Rule 2015. The entity with operational control of a designated large facility is responsible for meeting safeguard requirements, including that the facility must keep net emissions at or below baseline emission levels. Grange has two facilities which trigger the Safeguard Mechanism. The Port Latta Pelletising Plant has moved to a Production Adjusted Baseline and the Savage River Mine Site has moved to a Transitional Calculated Baseline.

### Renewable Energy (Electricity) Act 2000

In recognition that the Renewable Energy Targets scheme may increase costs to Companies that carry on Emissions Intensive Trade Exposed (EITE) activities, the exemption provisions under the Renewable Energy (Electricity) Act 2000 as amended allow a prescribed person to apply for an exemption certificate in relation to the electricity supplied to an EITE activity carried on at a site. Subject to agreement from the prescribed person an exemption certificate may be traded to the liable entity for the electricity supplied, and provides the liable entity with exemption from liability for a certain amount of megawatt-hours of electricity in the given calendar year. Grange has received exemption certificates under this scheme.

### **Climate Change Risk and Opportunities**

### Physical Risks

- Concentrated rainfall event causing flooding
- Rising sea levels and reduced rainfall causing groundwater scarcity

Risk related to transition to a low carbon economy

- Policy and legal risks as a result of government regulation of carbon emissions, resulting in higher energy prices and other production costs or restricted energy availability.
- Technology, market and reputation risk as a result of change in consumer expectations and demand for low carbon goods and services.

The Group identifies and monitors these risks through the enterprise risk assessment process and continues to identify opportunities for improvement. The Group acknowledges that the world is moving to a low-carbon future. The steel market is already starting to value 'green steel' and while our pellets reduce emissions in the production of steels, the Group will continue to explore opportunities to reduce carbon emissions in its production processes.

### **Meetings of directors**

The number of meetings of the company's Board of Directors ('the Board') and of each Board committee held during the year ended 31 December 2022, and the number of meetings attended by each director were:

		Nomination and						
		Full Board Remuneration Committee Audit and Risk Committee						
	Attended	Held	Attended	Held	Attended	Held		
M Li	13	13	6	6	6	6		
Y Jia	12	13	6	6	-	-		
H Zhao	13	13	-	-	-	-		
M Dontschuk	13	13	6	6	6	6		
A Saverimutto	13	13	-	-	6	6		

Held: represents the number of meetings held during the time the director held office or was a member of the relevant committee.

### **Remuneration Report**

The remuneration report details the key management personnel remuneration arrangements for the Group, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all directors.

### (i) Key management personnel disclosed in this report

Chief Financial Officer Chief Operating Officer

### (ii) Remuneration governance

The Board has an established Remuneration and Nomination Committee to assist in overseeing the development of policies and practices which enable the Company to attract and retain capable Directors and employees, reward employees fairly and responsibly and meet the Board's oversight responsibilities in relation to corporate governance practices.

The Remuneration and Nomination Committee is composed of Mr Michael Dontschuk (Independent Non-executive Director and Committee Chairperson) and Dr Michael Li (Independent Non-executive Chairperson).

The responsibilities and functions for the Remuneration and Nomination Committee include reviewing and making recommendations on the following:

- Equity based executive and employee incentive plans;
- Recruitment, retention, succession planning, performance measurement and termination policies and procedures for Non-executive Directors, Executive Directors and Key Management Personnel;
- The remuneration of the Chief Executive Officer, Chief Financial Officer and the Chief Operating Officer;
- Periodically assessing the skills required by the Board;
- Recommend processes to evaluate the performance of the Board, it's Committees and individual Directors; and
- Reviewing governance arrangements pertaining to remuneration matters.

The Charter is reviewed annually, and remuneration strategies are reviewed regularly.

### (iii) Executive remuneration philosophy and framework

It is the Company's objective to provide maximum stakeholder benefit from the retention of a small high-quality executive team by remunerating Executive Directors and executives fairly and appropriately with reference to relevant market conditions. To assist in achieving this objective, the Board attempts to link the nature and amount of executives' emoluments to the Company's performance. The remuneration framework aims to ensure that remuneration practices are:

- acceptable to shareholders, transparent and easily understood;
- competitive and reasonable, enabling the company to attract and retain key talents who share the same values with Grange Resources; and
- aligned to the Company's strategic and business objectives and the creation of shareholder value.

Using external remuneration sector comparative data, the Group has structured an executive remuneration framework that is market competitive and complementary to the reward strategy of the organisation. The framework is reviewed regularly along with the remuneration strategy review.

During the year, the Committee engaged remuneration consultants Godfrey Remuneration Group to provide advice and market insights in relation to executive remuneration arrangements.

The framework provides a mix of fixed and variable pay, and a blend of short and long term incentives detailed as follows:

### Fixed Remuneration

Fixed remuneration is reviewed annually by the Remuneration and Nomination Committee. The process consists of a review of Group and individual performance, relevant comparative remuneration externally and internally and, where appropriate, external advice on policies and practices.

Executives are given the opportunity to receive their fixed (primary) remuneration in a variety of forms including cash and fringe benefits. It is intended that the manner of payment chosen is optimal for the recipient without creating any undue cost for the Group.

There are no guaranteed fixed pay increases included in any executives' contracts.

### Variable Remuneration – Short Term Incentive ("STI")

The objective of the STI is to link the achievement of the Company's annual operational targets (usually reflected in the approved budgets) and an individual's personal targets with the remuneration received by selected executive directors and senior employees responsible for meeting those targets. Payments are made as a cash incentive payable after the financial statements have been audited and released to the Australian Securities Exchange ("ASX"). 50% of the STI relates to the achievement of company performance goals and 50% relates to the attainment of agreed personal performance goals.

### Variable Remuneration - Long Term Incentive ("LTI")

### a) Deferred Cash

A 3 year deferred cash long term incentive program commenced in 2019 with the final tranche to be paid in 2024. This long-term incentive program was replaced by a share-based payment scheme in 2022.

The deferred cash scheme is to reward selected executive directors and senior employees with a cash payment which is linked to the Company satisfying performance hurdles and subject to ongoing employment with Grange. The deferred cash component is determined by measuring the Company's progress made on:

- Development of mineral assets (weighting 35%)
- Mine development (weighting 20%)
- Downstream process improvement (weighting 15%)
- Financial returns (weighting 20%)
- Safety and sustainability (weighting 10%)

The deferred cash component is determined based on the Company's performance for the year ended 31 December, with 33.3% payable on 31 December the first following year, 33.3% payable on 31 December the second following year, and the balance payable on the following 31 December (i.e. 3 years after the relevant calculation date). Payment of deferred cash is subject to continuing employment with Grange at the scheduled date of the payment.

### b) Rights to Grange Shares

In 2022 the Company granted performance rights in three tranches to be settled by issuance of shares to three key management personnel. Each right is entitled to one equity share with a vesting date of 31 December 2024. Tranche 1 (with a weighting of 35%), has a total shareholder return (TSR) hurdle, tranche 2 (35% weighting) has a return on equity (ROE) hurdle and tranche 3 (30% weighting) has hurdles relating to non-market business objectives.

### (iv) Relationship between remuneration and Grange Resources performance

The table below shows key performance indicators of Company performance over the past five years.

		2018	2019	2020	2021	2022
Revenue from Operations	\$ million	368.20	368.60	526.30	781.70	594.60
Net profitafter tax	\$ million	112.94	77.30	203.19	321.60	171.74
Basic earnings per share	Cents	9.79	6.71	17.64	27.84	14.84
Dividend payments	\$ million	23.10	23.10	23.10	162.00	138.90
Share price (last trade day of						
financial year)	Cents	20.00	25.00	29.50	75.50	84.50

### v) Non-executive director remuneration policy

Fees and payments to Non-executive Directors reflect the responsibilities and demands made on them. Non-executive Directors' fees and payments are reviewed periodically by the Board. The Board also considers comparative market data and if required the advice of independent remuneration consultants to ensure Non-executive Directors' fees and payments are appropriate and in line with the market. The Chairperson's fees are determined independently to the fees of Non-executive Directors based on comparative roles in the external market.

The current remuneration was last reviewed with effect from 1 November 2014. The Chairperson's remuneration is inclusive of committee fees while other Non-executive Directors who chair a Committee receive additional yearly fees. The Deputy Chairperson is also entitled to receive an additional yearly fee

Non-executive Directors' fees are determined within an aggregate Directors' fee pool limit, which is periodically reviewed for adequacy. Any increase to the aggregate Directors' fee pool is submitted to shareholders for approval. The maximum currently stands at \$800,000 per annum and was approved by shareholders at the Annual General Meeting on 26 November 2010. Non-executive Directors do not receive performance-based pay.

Board of Directors	
Chairperson (1)	\$210,000
Deputy Chairperson	\$92,000
Non-executive Director	\$81,000
Audit and Risk Committee	
Chairperson	\$15,750
Committee Member	\$10,500
Remuneration and Nomination Committee	
Chairperson	\$15,750
Committee Member	\$7,500

<sup>(1)</sup> The Chairperson is not paid any additional amounts for Committee membership.

### vi) Details of remuneration

Details of the remuneration of the key management personnel of the Group are set out in the following tables.

Table 1: Remuneration for the year ended 31 December 2022

Table 3: Relative proportions linked to performance

The relative proportions of remuneration that are linked to performance and those that are fixed are as follows:

	Fixed Re	muneration	A	At Risk - STI	A	At Risk - LTI
Name	Dec-22	Dec-21	Dec-22	Dec-21	Dec-22	Dec-21
<b>Executive Directors</b>						
H Zhao	78%	77%	12%	13%	10%	10%
Key Management Personnel						
S Phan	77%	77%	13%	14%	10%	9%
B Maynard	77%	77%	13%	14%	10%	9%

### (vii) Service agreements

On appointment to the Board, all Non-executive Directors sign a letter of appointment with the Company. The document details the term of appointment, the role, duties and obligations of the Directors as well as the likely time commitment and performance expectations and review arrangements and circumstances relating to the vacation of office. In addition, it also summarises the major Board policies and terms, including compensation, relevant to the office of Director.

Remuneration and other terms of employment for the executives are formalised in service agreements. Each of the agreements provides for the provision of fixed pay, performance related variable remuneration and other benefits. The agreements with executives are ongoing and provide for termination of employment at any time by giving three months' notice or by the Company paying an amount equivalent to three months remuneration in lieu of notice.

### (viii) Details of STI and LTI (share-based payment) held by key management personnel

Performance based remuneration granted and forfeited during the year.

	Total STI Bonus (Cash) Total	Total STI Bonus (Cash)	Total STI Bonus (Cash)	Share-based Payment rights Value	Share-based Payment rights Value
2022	Opportunity \$	Awarded %	Forfeited %	Granted \$	Exercised \$
H Zhao	147,554	77	23	143,834	-
S Phan B Maynard	85,839 95,428	82 82	18 18	103,335 109,094	-
ь імаупаіч	328,821	02	10	356,263	

STI amounts are inclusive of superannuation.

### Share-based compensation

In May 2022 Grange Resources Limited (Parent Company) granted performance rights in three tranches and to be settled by issuance of shares to three key management personnel. Each right is entitled to one equity share with a vesting date of 31 December 2024.

Executive KMP participate, at the board's discretion, in the LTIP comprising performance rights which are subject to TSR hurdles (tranche 1) and series of non-market based business objectives (tranche 2 and 3).

Feature	Description
Opportunity/Allocation	CEO - 25% of Fixed Remuneration; Other Key Management Personnel - 20% of fixed remuneration.
Performance Hurdles	Tranche 1 performance rights is subject to a TSR performance vesting conditions
Exercise Price	Tranche 2 and 3 performance rights are not subject to a TSR Hurdle and require a series of non-market based business objectives to be met for the rights to be exercised.  \$ Nil
Forfeiture and Termination	In the event of a termination of employment by the Company for cause, all unvested rights will be forfeited unless otherwise determined by the Board.
	Cessation of employment in other cases will generally result in pro-rate forfeiture of the rights.
Measurement Period	22 February 2022 to 30 December 2024
Fair value Measurement at Grant Date	Tranche 1 is estimated using a Monte Carlo Model and Tranche 2 and 3 using black Scholes Option pricing

### Performance Conditions for Each Tranche

Tranche 1 Performance Level	Annualised Grange TSR Compared to TSR of the ASX 300 Metals and Mining TR Index	% of Tranche Vesting
Stretch	> Index TSR + 9% TSR CAGR	100%
Between Target and Stretch	Index TSR + 2% TSR CAGR & <index +="" 9%<="" p="" tsr=""></index>	Pro-rata
	TSR CAGR	
Target	Index TSR + 2% TSR CAGR	50%
Between Threshold and Target	> Index TSR & <index +="" 2%="" cagr<="" td="" tsr=""><td>Pro-rata</td></index>	Pro-rata
Threshold	= Index TSR	25%
Below Threshold	< Index TSR	0%

Note: A Gate TSR being positive applies to this metric (will not pay out if TSR is not >0%)

### Tranche 2

30 May 2022	31 December 2024	24 May 2037	Nil	\$22,202	To be determined	-

### Reconciliation of Performance rights held be each key management personnel

2022 Name and Grant Date	Balance at the Start of the year Unvested	Granted as Compensation	Vested Number	Vested %	Exercised Number	Balance at the end of the year Vested	Balance at the end of the year Unvested	Maximum value yet to vest
H Zhao 11 May		440.040					440.040	\$400.0 <b>7</b> 0
2022 S Phan 30 May	-	140,342	-	-	-	-	140,342	\$122,273
2022 B Maynard 27 May	-	74,707	-	-	-	-	74,707	\$87,845
2022	-	80,680	-	-	-	-	80,680	\$92,741

### Share holdings

The number of shares in the Company held during the period by each Director of Grange Resources Limited and other key management personnel of the Group, including their personally related parties, are set out below:

31 December 2022	Balance 1 January 2022	On vesting rights	On market purchases	On market disposals	Balance Other 31 December 2022
Director of Grange Resources Limited					
M Li	13,507	-	-	-	- 13,507
M Dontschuk	13,000	-	-	-	- 13,000
H Zhao	1,727,702	-	-	-	- 1,727,702
Y Jia	-	-	-	-	
A Saverimutto	-	-	-	-	
Key Management Personnel					
B Maynard	68,122	-	-	-	- 68,122
	1,822,331	-	-	-	- 1,822,331

No directors have relevant options and rights interest at the date of this report.

Y Jia is an employee of Jiangsu Shagang International Trade Co. Ltd which is a subsidiary of the Jiangsu Shagang Group, ultimate shareholder of Shagang International Holdings Limited. Shagang International Holdings Limited and its affiliates hold 554,762,656 ordinary fully paid shares in the Company as at the date of this report.

### (ix) Loans to key management personnel

There were no loans to key management personnel during the year.

### (x) Other transactions with Directors and key management personnel

A director, Ms Yan Jia, is an employee of Shagang International Trade Co. Ltd., which is a wholly owned subsidiary of Jiangsu Shagang Group (Shagang) to which sales of iron ore products are made under long-term off-take agreements. Transactions between Shagang and Grange must be approved by non-associated shareholders of Shagang, or approved by the Grange independent directors.

Aggregate amounts of each of the above types of other transactions:

2022 2021

#### Sales of Iron Ore Products

Pellets 211,922,470 216,292,463

The following balances are outstanding at the end of the reporting period in relation to the above transactions:

2022 2021 \$ \$

Trade receivables (sales of iron ore products)

Pellets 15,241,644 19,095,808 Others - (62,961)

15,241,644 19,032,847

### (xi) Reliance on external remuneration consultants

In February 2022, the remuneration committee engaged Godfrey Remuneration Group to provide recommendations regarding alignment of LTVR approaches with best practices. GRG was paid \$5,000 for this service.

The following arrangements were made to ensure that the remuneration recommendations were free from undue influence:

- GRG was engaged by, and reported directly to, the chair of the remuneration committee. The agreement for the
  provision of remuneration consulting services was executed by the chair of the remuneration committee under delegated
  authority on behalf of the board.
- The report containing the remuneration recommendations was provided by GRG directly to the chair of the remuneration committee; and
- GRG was permitted to speak to management throughout the engagement to understand company processes, practices
  and other business issues and obtain management perspectives. However, GRG was not permitted to provide any
  member of management with a copy of their draft or final report that contained the remuneration recommendations As
  a consequence, the board is satisfied that the recommendations were made free from undue influence from any
  members of the key management personnel.

In addition to providing remuneration recommendations, GRG was also engaged to draft the LTVR/Rights documentation and administration services in relation to the offer. For these services GRG was paid a total of \$24,750

### Indemnity and insurance of officers

During the financial period, the Company has paid premiums in respect of Directors' and Officers' Liability Insurance and Company Reimbursement policies, which cover all Directors and Officers of the Group to the extent permitted under the Corporations Act 2001. The policy conditions preclude the Group from any detailed disclosures.

### Proceedings on behalf of the company

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the company, or to intervene in any proceedings to which the company is a party, for the purpose of taking responsibility on behalf of the company for all or part of those proceedings. No proceedings have been brought or intervened in on behalf of the company with leave of the Court under section 237 of the Corporations Act 2001.

### Indemnity and insurance of auditor

The Company has entered into an agreement to indemnify its auditor, PwC, against any claims or liabilities (including legal costs) asserted by third parties arising out of their services as auditor of the Company, where the liabilities arise as a direct result of the Company's breach of its obligations to the Auditors, unless prohibited by the Corporations Act 2001.

### **Audit and Non-audit services**

The Board of Directors has considered the position and, in accordance with advice received from the Company's Audit and Risk Committee, is satisfied that the provision of non-audit services is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001. The Directors are satisfied that the provision of non-audit services by the auditor, as set out below, did not compromise the auditor independence requirements of the Corporations Act 2001 for the following reasons:

- all non-audit services have been reviewed by the Audit and Risk Committee to ensure they do not impact the impartiality and objectivity of the auditor; and
- none of the services undermine the general principles relating to auditor independence as set out in APES 110 Code of Ethics for Professional Accountants.

During the year the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non-related audit firms:

	2022 \$'000	2021 \$'000
A		
Assurance Services		
PwC Australia		
Audit and review of financial reports	239	313
Other assurance services	27	102
Network firms of PwC Australia	18	17
Total assurance services	284	432
Non-Assurance Services		
PwC Australia		
Taxation compliance services	-	8
Total remuneration paid	284	440

It is the Group's policy to employ PwC on assignments additional to their statutory audit duties where PwC's expertise and experience with the Group are important. These assignments are principally tax consulting and advice or where PwC is awarded assignments on a competitive basis. It is the Group's policy to seek competitive tenders on all major consulting assignments. Group policy also requires the Chairperson of the Audit and Risk Committee to approve all individual assignments performed by PwC with total fees greater than \$10,000.

#### Officers of the company who are former partners of PricewaterhouseCoopers

There are no officers of the company who are former partners of PricewaterhouseCoopers.

### Rounding of amounts

The company is of a kind referred to in Corporations Instrument 2016/191, issued by the Australian Securities and Investments Commission, relating to 'rounding-off'. Amounts in this report have been rounded off in accordance with that Corporations Instrument to the nearest thousand dollars, or in certain cases, the nearest dollar.

### Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out immediately after this directors' report.

### **CORPORATE GOVERNANCE STATEMENT**

Grange is committed to creating and building sustainable value for shareholders and protecting stakeholder interests. The Company recognises that high standards of corporate governance are essential to achieving that objective.

The Board has the responsibility for ensuring Grange is properly managed so as to protect and enhance shareholders' interests in a manner that is consistent with the Company's responsibility to meet its obligations to all stakeholders. For this reason, the Board is committed to applying appropriate standards of corporate governance across the organisation.

As part of its commitment to enhancing its corporate governance, and as a listed company, the Board has adopted relevant practices which are consistent with the Australian Securities Exchange ("ASX") Corporate Governance Principles. The 2021 corporate governance statement was approved by the Board on 22 February 2023.

Details of the Company's corporate governance practices are included in the Corporate Governance Statement and Appendix 4G which have been announced on the ASX and can be located on our Company's website www.grangeresources.com.au in the Corporate Governance and Policies section in the About Us area. This facilitates transparency about Grange's corporate governance practices and assists shareholders and other stakeholders make informed judgments.

Grange considers that its governance practices comply with the majority of the ASX Best Practice Recommendations.

### **ASX Best Practice Recommendations**

The following table lists the departures from the ASX Best Practice Recommendations applicable to the Company as at the date of its financial year end, being 31 December 2022. Where the Company considers that it is divergent from these recommendations, or that it is not practical to comply, there is an explanation of the Company's reasons set out in the following table.

"Recommendation" Ref ("Principle No" Ref followed by Recommendation Ref) 7.3(a)

A separate internal audit function has not been formed.

An Internal Audit function has not been established as per recommendation 7.3(a), The Board monitors the need for an internal audit function having regard to the size, geographic location and complexity of the Company's operations.

The Company's Management periodically undertakes an internal review of financial systems and processes and where systems are considered to require improvement these systems are developed. The Board also considers external reviews of specific areas and monitors the implementation of system improvements.

This report is made in accordance with a resolution of directors, pursuant to section 298(2)(a) of the Corporations Act 2001.

On behalf of the directors

Michelle Li

Chairperson of the Board of Directors

24 February 2023

### Auditor's Independence Declaration

As lead auditor for the audit of Grange Resources Limited for the year ended 31 December 2022, I declare that to the best of my knowledge and belief, there have been:

- (a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- (b) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Grange Resources Limited and the entities it controlled during the period.

Chris Dodd

Partner

PricewaterhouseCoopers

Melbourne 24 February 2023

Balance at 31 December 2022	331,513	(2,220)	574,833	_	904,126

### Grange Resources Limited Consolidated statement of cash flows For the year ended 31 December 2022

	Note	2022 \$'000	2021 \$'000
Cash flows from operating activities			
Receipts from customers and other debtors (inclusive of goods and services tax)		561,485	841,849
Payments to suppliers and employees (inclusive of goods and services tax)		(291,866)	(305,541)
		269,619	536,308
Interest received		7,528	6,442
Interest and other finance costs paid		(1,047)	(304)
Income taxes paid		(101,777)	(44,286)
Tax refund on capitalised mining costs in South Deposit Tailing Storage Facility		22,622	
Net cash inflow from operating activities	32	196,945	498,160
Cash flows from investing activities			
Payments for property, plant and equipment	16	(87,733)	(39,996)
Payments for mine properties and development	10	(136,846)	(40,074)
Proceeds from sale of property, plant and equipment		(100,040)	(40,074)
Proceeds from managed funds		19,493	_
Proceeds (Payments) for term deposits		(191,159)	504
Net cash outflow from investing activities		(396,244)	(79,566)
Not oddin oddinow from invooding dodivideo		(000,244)	(10,000)
Cash flows from financing activities			
Dividends paid to shareholders	25	(138,881)	(162,028)
Repayment of lease liabilities		(6,670)	(3,222)
Net cash outflow from financing activities		(145,551)	(165,250)
Net increase/(decrease) in cash and cash equivalents		(344,850)	253,344
Cash and cash equivalents at the beginning of the financial year		443,890	183,385
Effects of exchange rate changes on cash and cash equivalents		9,371	7,161
Cash and cash equivalents at the end of the financial year	12	108,411	443,890

### Note 1. Summary of Significant Accounting Policies

The principal accounting policies adopted in the preparation of the consolidated financial statements are set out below. These policies have been consistently applied for all the periods presented, unless otherwise stated.

The financial statements are for the consolidated entity consisting of Grange Resources Limited and its subsidiaries.

### a) Basis of preparation

This general purpose financial report has been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board and the Corporations Act 2001. Grange Resources Limited is a for-profit entity for the purpose of preparing the financial statements.

### Compliance with IFRS

The consolidated financial statements of the Grange Resources Limited group also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

### Historical cost convention

These financial statements have been prepared under the historical costs convention, except for certain assets which, as noted, are at fair value.

### New and amended standards adopted by the group

The group has applied the following standards and amendments for the first time for their annual reporting period commencing 1 January 2022:

AASB 2020-3 Amendments to Australian Accounting Standards – Annual Improvements 2018-2020 and Other Amendments (AASB1, AASB3, AASB9, AASB116, AASB137 & AASB141)

The amendments listed above did not have any impact on the amounts recognised in prior periods and are not expected to significantly affect the current or future periods.

### New standards and interpretations not yet adopted

Certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2022 reporting periods and have not been early adopted by the group. These standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

### Comparative figures

Where necessary, comparative figures have been adjusted to conform to changes in the presentation in the current period.

### Critical accounting estimates

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 3.

### **Note 1. Summary of Significant Accounting Policies (continued)**

### (b) Principles of consolidation

### (i) Subsidiaries

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Grange Resources Limited as at 31 December 2022 and the results of all subsidiaries for the year then ended. Grange Resources Limited and its subsidiaries together are referred to in this financial report as the Group or the consolidated entity.

Subsidiaries are those entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases. Details of subsidiaries are set out in note 31.

The acquisition method of accounting is used to account for business combinations by the Group (refer to note 1(e)).

Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

### (ii) Joint arrangements

Joint operations

The Group recognises its direct right to the assets, liabilities, revenues and expenses of joint operations and its share of any jointly held or incurred assets, liabilities, revenues and expenses. These have been incorporated in the financial statements under the appropriate headings. Details of the joint operations are set out in note 32.

### (c) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Chief Executive Officer.

Refer to note 4 for further information on segment descriptions.

### d) Foreign currency translation

### (i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Australian dollars, which is Grange Resources Limited's functional and presentation currency.

### Note 1. Summary of Significant Accounting Policies (continued)

### (ii) Transactions and balances

All foreign currency transactions during the financial period are translated into the functional currency using the exchange rate prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss, except when they are deferred in equity as qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investment in a foreign operation.

Non-monetary items that are measured in terms of historical cost in foreign currency are translated using the exchange rate as at the date of the initial transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

### (iii) Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet.
- income and expenses for each income statement are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions), and
- all resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings and other financial instruments designated as hedges of such investments, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, a proportionate share of such exchange differences are reclassified to the income statement, as part of the gain or loss on sale where applicable. Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entities and translated at the closing rate.

### (e) Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the

- fair values of the assets transferred
- liabilities incurred to the former owners of the acquired business
- equity interests issued by the Group
- fair value of any asset or liability resulting from a contingent consideration arrangement, and
- fair value of any pre-existing equity interest in subsidiary

Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets. Acquisition-related costs are expensed as incurred.

### The excess of the

- Consideration transferred,
- amount of any non-controlling interest in the acquired entity, and
- acquisition-date fair value of any previous equity interest in the acquired entity

### **Note 1. Summary of Significant Accounting Policies (continued)**

over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the subsidiary acquired, the difference is recognised directly in profit or loss as a bargain purchase. Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in profit or loss.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquire is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in profit or loss.

### (f) Revenue recognition and other income

Revenue is recognised for the major business transactions as follows:

Sale of ore and the related freight revenue

Sales revenue is recognised on individual sales when control transfers to the customer. In most instances, control passes and sales revenue is recognised when the product is delivered to the vessel on which it will be transported. There may be circumstances when judgment is required when recognising revenue based on the five-step model below:

- (i) Identify the contract(s) with a customer
- (ii) Identify the performance obligations in the contact
- (iii) Determine the transaction price
- (iv) Allocate the transactions price to the performance of obligations in the contract.
- (v) Recognise revenue when (or as) the entity satisfies the performance obligation.

The Group sells a portion of its product on Cost and Freight (CFR). For CFR contracts passes and sales revenue is recognised when the product is delivered to the vessel on which it will be transported. Using the 5-step model above, the Group has determined that freight services is a separate performance obligation. Therefore, the revenue for shipping services is recognised as the Group satisfies the performance obligation over time rather than at point when product is transferred to the vessel on which the product will be shipped.

Typically, the Group has a right to payment at the point that control of the goods passes including a right, where applicable, to payment for provisionally priced products and unperformed freight services. Cash received before control passes is recognised as a contract liability. The amount of consideration does not contain a significant financing component as payment terms are less than one year.

### Interest income

Interest income is recognised on a time proportion basis using the effective interest method.

### Sale of apartments

Revenue is recognised when control of a good or service transfers to a customer. In most instances, control passes, and sales revenue is recognised when legal title of the property is transferred to the buyer. There may be circumstances when judgment is required based on the five indicators of control below:

### **Note 1. Summary of Significant Accounting Policies (continued)**

- (i) The buyer has the significant risks and rewards of ownership and has the ability to direct the use of, and obtain substantially all of the remaining benefits from the good or service;
- (ii) The buyer has a present obligation to pay in accordance with the terms of the sales contract. For property disposed of, this is generally on transfer of legal title, at which time settlement of the remaining contract price occurs;
- (iii) The buyer has accepted the asset;
- (iv) The buyer has legal title to the asset; and
- (v) The buyer has physical possession of the asset

AASB 15 requires the Group to identify deliverables in contracts with customers that qualify as 'performance obligations'. The transaction price receivable from customers must be allocated between the Group's performance obligations under the contracts on a relative stand-alone selling price basis. Revenue will be recognised at a point in time when the performance obligations are met.

#### Distribution Income

Distribution income from short term managed funds is recognised when the right to receive the income has been established.

### (g) Government Grants

Government grants are recognised at their fair value when there is reasonable assurance that the grant will be received, and all attaching conditions will be complied with.

When the grant relates to an expense item, it is recognised as income over the periods necessary to match the grant on a systematic basis to the costs that it is intended to compensate.

When the grant relates to an asset, the fair value is credited to a deferred income account and is released to the income statement over the expected useful life of the relevant asset by equal annual instalments.

### (h) Leases

### i. The group's leasing activities and how these are accounted for

The group leases office spaces, mobile radars, forklifts, and motor vehicles with lease terms between 1 to 5 years but may have extension options as described below. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions.

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period as to produce a constant periodic rate of interest on the remaining balance of the liability for each period – refer to Note 9. The right of use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease payments included in the measure of the lease liability comprise:

- fixed payments less any lease incentives
- variable lease payments that are based on an index or rate
- amounts expected to be payable under residual value guarantees
- purchase option exercise price where lessee is reasonably certain to exercise
- ease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option
- penalties for termination of lease

### Note 1. Summary of Significant Accounting Policies (continued)

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of a similar value in a similar economic environmental with similar terms and conditions.

The Group presents lease liabilities in the statement of financial position (note 16).

Right-of-use assets are initially measured at cost comprising of the following:

- the amount of the initial measurement of the lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and an
- restoration costs.

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases of less than 12 months and leases of low-value assets. The Group recognises lease payments associated with these types of leases as an expense in the profit or loss.

#### ii. Extension options

Options for a new lease are stipulated in the office space and mobile radars lease and are only exercisable by the Group, not the lessor. Exercising the option will contain similar terms as the initial lease. In determining the lease term under AASB 16, management considers all facts and circumstances that create an economic incentive to exercise the extension option or not exercise a termination option. The Group reassesses whether it is reasonably certain to exercise the options if there is a significant event or significant change in the circumstances within its control.

### iii. Variable lease payments

The group is exposed to potential future increases in variable lease payments based on an index or rate. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right of use asset. The forklift hire lease contains variable lease payments that are subject to CPI adjustments, effective on an annual basis.

### (i) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to amounts of cash and which are subject to an insignificant risk of changes in value. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

### (j) Trade and other receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less loss allowance.

As permitted by AASB 9, the Group applies the 'simplified approach' to trade receivable balances and the 'general approach' to all other financial assets. The simplified approach requires expected lifetime credit losses to be recognised from initial recognition of the receivables. The general approach incorporates a review for any significant increase in counterparty credit risk since inception.

The expected credit losses (ECL) review include assumptions about the risk of default and expected credit loss rates. In determining the recoverability of a trade or other receivable using the ECL model, the Group performs a risk analysis considering the type and age of the outstanding receivables, the creditworthiness of the counterparty, contract provisions, letter of credit and timing of payment.

### **Note 1. Summary of Significant Accounting Policies (continued)**

### (k) Inventories

Raw materials and stores, ore stockpiles, work in progress and finished goods are stated at the lower of cost and net realisable value. Cost is determined primarily on the basis of weighted average costs and comprises of the cost of direct materials and the costs of production which include:

- labour costs, materials and contractor expenses which are directly attributable to the extraction and processing of ore;
- depreciation of property, plant and equipment used in the extraction and processing of ore; and
- production overheads directly attributable to the extraction and processing of ore

Stockpiles represent ore that has been extracted and is available for further processing. If there is significant uncertainty as to when the stockpiled ore will be processed it is expensed as incurred. Where the future processing of the ore can be predicted with confidence because it exceeds the mine's cut-off grade, it is valued at the lower of cost and net realisable value. Work in progress inventory includes partly processed material. Quantities are assessed primarily through surveys and assays.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Development work in progress pertains to development and construction of housing units and comprises expenditures relating to:

- Cost of acquisition
  - The cost of acquisition comprises the purchase price of the land along with any direct costs incurred as part of the acquisition including legal, valuation and stamp duty costs
- Development and other costs
  - Cost includes variable and fixed costs directly related to specific contracts, costs related to general contract activity which can be allocated to specific projects on a reasonable basis, and other costs specifically chargeable under the contract.
- Interest capitalised
  - Financing costs on the purchase and development of housing units are also included in the cost of inventory.

### **Note 1. Summary of Significant Accounting Policies (continued)**

#### (I) Income tax

The income tax expense or benefit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Group's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised, or the deferred income tax liability is settled.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses, only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses. In assessing the recoverability of deferred tax assets, the Group relies on the same forecast assumptions used elsewhere in the financial statements and in other management reports, which, among other things, reflect the potential impact of climate-related development on the business, such as increased cost of production as a result of measures to reduce carbon emission.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and the tax bases of investments in foreign operations where the Group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Grange Resources Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation. As a consequence, Grange Resources Limited and its subsidiaries are taxed as a single entity and the deferred tax assets and liabilities of the Group are set off in the consolidated financial statements.

### (m) Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST except:

- when GST incurred on a purchase of goods and services is not recoverable from taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables, which are stated with the amount of GST included

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

Commitments and contingencies are presented net of the amount of GST recoverable from, or payable to, the taxation authority.

Cash flows are included in the Statement of Cash Flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority, are presented as operating cash flows.

Commitments and contingencies are presented net of the amount of GST recoverable from, or payable to, the taxation authority.

### **Note 1. Summary of Significant Accounting Policies (continued)**

### (n) Property, plant and equipment

Land and buildings and plant and equipment are measured at cost less, where applicable, any accumulated depreciation, amortisation or impairment in value. Cost includes expenditure that is directly attributable to the acquisition of the item. In the event that all or part of the purchase consideration is deferred, cost is determined by discounting the amounts payable in the future to their present value as at the date of acquisition.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to the income statement during the reporting period in which they are incurred.

Land is not depreciated. Assets under construction are measured at cost and are not depreciated until they are ready and available for use. Depreciation on assets is calculated using either a straight-line or diminishing value method to allocate the cost, net of their residual values, over the estimated useful lives or the life of the mine, whichever is shorter. Leasehold improvements and certain leased plant and equipment are depreciated over the shorter lease term.

Other non-mine plant and equipment typically has the following estimated useful lives:

Buildings 10 years
Plant and Equipment 4 to 8 years
Computer Equipment 3 to 5 years

The assets residual values, useful lives and amortisation methods are reviewed and adjusted if appropriate, at each financial period end.

An item of property, plant and equipment is derecognised upon disposal or when no further economic benefits are expected from its use or disposal.

Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement in the period the asset is derecognised.

The carrying value of property, plant and equipment is assessed annually for impairment in accordance with note 1(r).

### (o) Exploration and evaluation

Exploration and evaluation expenditure comprise costs which are directly attributable to:

- research and analysing exploration data
- conducting geological studies, exploratory drilling and sampling
- examining and testing extraction and treatment methods
- compiling pre-feasibility and definitive feasibility studies

#### **Note 1. Summary of Significant Accounting Policies (continued)**

Exploration and evaluation expenditure also include the costs incurred in acquiring rights, the entry premiums paid to gain access to areas of interest and amounts payable to third parties to acquire interests in existing projects.

Exploration and evaluation expenditure is charged against profit and loss as incurred; except for expenditure incurred after a decision to proceed to development is made, in which case the expenditure is capitalised as an asset.

#### (p) Mine properties and development

Mine properties and development represent the accumulation of all exploration, evaluation and development expenditure incurred by, not on behalf of, the entity in relation to areas of interest in which mining of a mineral resource has commenced.

Where further development expenditure is incurred in respect of a production property after the commencement of production, such expenditure is carried forward as part of the cost of that production property only when substantial future economic benefits arise, otherwise such expenditure is classified as part of the cost of production.

Costs on production properties in which the Group has an interest are amortised over the life of the area of interest to which such costs relate on the production output basis. Changes to the life of the area of interest are accounted for prospectively.

The carrying value of each mine property and development are assessed annually for impairment in accordance with note 1(r).

#### (a) Deferred stripping costs

Stripping (i.e. overburden and other waste removal) costs incurred in the production phase of a surface mine are capitalised to the extent that they improve access to an identified component of the ore body and are subsequently amortised on a systematic basis over the expected useful life of the identified component of the ore body. Capitalised stripping costs are disclosed as a component of Mine Properties and Development.

Components of an ore body are determined with reference to life of mine plans and take account of factors such as the geographical separation of mining locations and/or the economic status of mine development decisions.

Capitalised stripping costs are initially measured at cost and represent an accumulation of costs directly incurred in performing the stripping activity that improves access to the identified component of the ore body, plus an allocation of directly attributable overhead costs. The amount of stripping costs deferred is based on a relevant production measure which uses a ratio obtained by dividing the tonnage of waste mined by the quantity of ore mined for an identified component of the ore body. Stripping costs incurred in the period for an identified component of the ore body are deferred to the extent that the current period ratio exceeds the expected ratio for the life of the identified component of the ore body. Such deferred costs are then charged against the income statement on a systematic units of production basis over the expected useful life of an identified component of the ore body.

Changes to the life of mine plan, identified components of an ore body, stripping ratios, units of production and expected useful life are accounted for prospectively.

Deferred stripping costs form part of the total investment in a cash generating unit, which is reviewed for impairment if events or changes in circumstances indicate that the carrying value may not be recoverable.

#### **Note 1. Summary of Significant Accounting Policies (continued)**

#### (r) Impairment of assets

At each reporting date, the Group assesses whether there is any indication that an asset, including capitalised development expenditure, may be impaired. Where an indicator of impairment exists, the Group makes a formal estimate of the recoverable amount. Where the carrying amount of an asset exceeds its recoverable amount the asset is considered impaired and is written down to its recoverable amount. Impairment losses are recognised in the income statement.

Recoverable amount is the greater of fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash generating units).

Where there is no binding sale agreement or active market, fair value less costs of disposal is based on the best information available to reflect the amount the Group could receive for the cash generating unit in an arm's length transaction. In assessing fair value, the estimated future cash flows are discounted to their present value using a post-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An assessment is also made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the pre-impairment value, adjusted for any depreciation that would have been recognised on the asset had the initial impairment loss not occurred. Such reversal is recognised in profit or loss.

After such a reversal the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

The Group assesses where climate risks could have a significant impact, such as the introduction of emission reduction legislation that may increase mining and production costs. At present, albeit climate-related risks should be factored into the commodity price, this has no direct impact to the Group's asset recoverable value.

#### (s) Investments and other financial assets

#### (i) Classification

The group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income (OCI) or through profit or loss), and
- those to be measured at amortised cost.

### Note 1. Summary of Significant Accounting Policies (continued)

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The group reclassifies debt investments when and only when its business model for managing those assets changes.

#### (ii) Recognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

#### (iii) Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Debt instruments. Subsequent measurement of debt instruments depends on the group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the group classifies its debt instruments:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely
  payments of principal and interest are measured at amortised cost. Interest income from these financial assets is
  included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is
  recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and
  losses. Impairment losses are presented as separate line item in the statement of profit or loss.
- FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss.
  - When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest
  - rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as separate line item in the statement of profit or loss.
- FVPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt
  investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other
  gains/(losses) in the period in which it arises.

### **Note 1. Summary of Significant Accounting Policies (continued)**

#### Equity instruments

The group subsequently measures all equity investments at fair value. Where the group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in other gains/(losses) in the statement of profit or loss as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

#### (iv) Impairment

The group assesses on a forward-looking basis, the expected credit losses associated with its debt instruments carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

#### (t) Derivatives

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in profit or loss and are included in other income or other expenses.

The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months; it is classified as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

### **Note 1. Summary of Significant Accounting Policies (continued)**

#### (u) Ore reserves

The Company estimates its mineral resources and ore reserves based on information compiled by Competent Persons as defined in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves of December 2012 (the JORC 2012 code). Reserves, and certain mineral resources determined in this way, are used in the calculation of depreciation, amortisation and impairment charges, the assessment of life of mine stripping ratios and for forecasting the timing of the payment of close down and restoration costs.

In assessing the life of a mine for accounting purposes, mineral resources are only taken into account where there is a high degree of confidence of economic extraction.

### (v) Trade and other payables

Trade payables and other payables are carried at amortised cost and represent liabilities for goods and services provided to the Group prior to the end of the financial period that are unpaid. Trade payables and other payables arise when the Group becomes obliged to make future payments in respect of the purchase of these goods and services. The amounts are unsecured and are usually paid within 30 days of recognition.

#### (w) Borrowings

All borrowings are initially recognised at the fair value of the consideration received, less transaction costs. After initial recognition, borrowings are subsequently measured at amortised cost. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

#### **Note 1. Summary of Significant Accounting Policies (continued)**

#### Borrowing costs

Borrowing costs incurred for the construction of any qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed.

#### (x) Provisions

Provisions are recognised when the Group has a present obligation, it is probable that there will be a future sacrifice of economic benefits and a reliable estimate can be made of the amount of the obligation.

When the Group expects some or all of a provision to be recovered from a third party, for example under an insurance contract, the receivable is recognised as a separate asset but only when the reimbursement is virtually certain, and it can be measured reliably. The expense relating to any provision is presented in the income statement net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a pre-tax rate that reflects the current market assessment of the time value of money. Where this is the case, its carrying amount is the present value of these estimated future cash flows. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

The impact of climate-related matters on remediation of sites is considered when determining the decommissioning liability. The Group also constantly monitors new government legislation in relation to climate-related matters. At the current time, no climate related matters and legislation that expected to have a material impact on the Group's decommissioning liability.

#### Decommissioning and restoration

Decommissioning and restoration provisions include the dismantling and demolition of infrastructure and the removal of residual materials and remediation of disturbed areas. The provision is recognised in the accounting period when the obligation arising from the related disturbance occurs, whether this occurs during the mine development or during the production phase, based on the net present value of estimated future costs. The costs are estimated on the basis of a closure plan. The cost estimates are calculated annually during the life of the operation to reflect known developments and are subject to formal review at regular intervals.

The amortisation or 'unwinding' of the discount applied in establishing the net present value of provisions is charged to the income statement in each accounting period. The amortisation of the discount is shown as a financing cost, rather than as an operating cost. Other movements in the provisions for close down and restoration costs, including those resulting from new disturbance, updated cost estimates, changes to the lives of operations and revisions to discount rates are capitalised within mine properties and development, to the extent that any amount of deduction does not exceed the carrying amount of the asset. Any deduction in excess of the carrying amount is recognised in the income statement immediately. If an adjustment results in an addition to the cost of the related asset, consideration will be given to whether an indication of impairment exists, and the impairment policy will apply. These costs are then depreciated over the life of the area of interest to which they relate.

#### **Note 1. Summary of Significant Accounting Policies (continued)**

#### (y) Employee entitlements

#### Wages, salaries and sick leave

Liabilities for wages and salaries, including non-monetary benefits and accumulating sick leave expected to be settled within 12 months of the reporting date are recognised in other payables in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled.

#### Annual leave

Liabilities for annual leave expected to be settled within 12 months of the reporting date are recognised in the provision for employee benefits in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled.

#### Long service leave

The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method.

Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on corporate bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

Defined contribution superannuation funds Contributions to defined contribution funds are recognised as an expense in the income statement as they become payable.

### Share-based payments

Senior Executives of the Group receive remuneration in the form of share-based payments, whereby employees render services in exchange for equity instruments (equity-settled transactions).

The fair value of performance rights granted is recognised as an employee benefits expense with a corresponding increase in equity. The total amount to be expensed is determined by reference to the fair value of the options granted.

- including any market performance conditions
- excluding the impact of any service and non-market performance vesting conditions
- Including the impact of any non-vesting conditions

The total expense is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At the end of each period, the entity revises its estimates of the number of performance rights that are expected to vest based on the non-market vesting and service conditions. It recognises the impact of the revision to original estimates, if any, in profit or loss, with a corresponding adjustment to equity.

The dilutive effect of outstanding performance rights is reflected as additional share dilution in the computation of diluted earnings per share (further details are given in Note 33).

#### Note 1. Summary of Significant Accounting Policies (continued)

#### (z) Contributed equity

Ordinary share capital is recognised at the fair value of the consideration received by the Company. Any transaction costs arising on the issue of ordinary shares are recognised directly in equity as a reduction, net of tax, of the share proceeds received.

#### (aa) Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the financial period but not distributed at balance date.

#### (ab) Earnings per share (EPS)

#### (i) Basic earnings per share

Basic earnings per share is calculated by dividing:

- the profit attributable to equity holders of the Company, excluding any costs of servicing equity other than ordinary shares:
- by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the period and excluding treasury shares.

#### (ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- the after-income tax effect of interest and other financing costs associated with the dilutive potential ordinary shares;
   and
- the weighted average number of additional ordinary shares that would have been outstanding assuming the conversion of all dilutive potential ordinary shares.

#### (ac) Parent entity financial information

The financial information for the parent entity, Grange Resources Limited, disclosed in note 35 has been prepared on the same basis as the consolidated financial statements, except as set out below.

Investments in subsidiaries, associates and joint venture entities

Investments in subsidiaries and joint venture entities are accounted for at cost in the financial statements of Grange Resources Limited. Dividends received from associates are recognised in the parent entity's profit or loss, rather than being deducted from the carrying amount of these investments.

#### Financial guarantees

Where the parent entity has provided financial guarantees in relation to loans and payables of subsidiaries for no compensation, the fair values of these guarantees are accounted for as contributions and recognised as part of the cost of the investment.

### (ad) Rounding of amounts

The Group is of a kind referred to in ASIC Legislative Instrument 2016/191 Class, issued by the Australian Securities and Investments Commission, relating to the "rounding off" of amounts in the financial report. Amounts in the financial report have been rounded off in accordance with the instrument to the nearest thousand dollars, or in certain cases, the nearest dollar.

#### Note 2. Financial Risk Management

#### Financial risk management objectives

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group has used derivative financial instruments such as foreign exchange contracts and forward commodity contracts to manage certain risk exposures. Derivatives are exclusively used for hedging purposes, i.e. not as trading or other speculative instruments. The Group uses different methods to measure different types of risks to which it is exposed. These methods include sensitivity analysis in the case of interest rate, foreign exchange and commodity price risks and aging analysis for credit risk.

Risk management is carried out by the management team following guidance received from the Audit and Risk Committee.

No events occurred in the current and prior periods that give rise to material items of income or expense as a result of climate.

The Group holds the following financial instruments:

	2022 \$'000	2021 \$'000
	Ψ 000	Ψ 000
Financial Assets		
Cash and Cash Equivalent	108,411	443,890
Trade and other receivables	66,159	31,604
Other financial assets	193,761	1,207
Short Term Managed Funds	- 368,331	19,592 <b>496,293</b>
	300,331	490,293
Financial Liabilities		
Trade and other payables	67,723	120,836
	67,723	120,836
The carrying amount and movement in Short Term Managed Funds are se	et out below:	
	2022	2021
	\$'000	\$'000
Short Term Managed Funds		
Balance at the beginning of the year	19,592	19,539
Movement in short term managed funds	(19,592)	53
Carrying amount at the end of the year	-	19,592
Net debt reconciliation		
This section sets out an analysis of net debt and the movements in net debt	ot for each of the periods presented.	
	2022	2021
	\$'000	\$'000

2022

2024

#### Note 2. Financial Risk Management (continued)

#### Financial assets/(liabilities) at fair value through profit or loss (FVPL)

The group classifies the following financial assets at fair value through profit or loss (FVPL)

- (i) Short term managed funds
- (ii) Derivative financial instruments

	2022 \$'000	2021 \$'000
Short Term Managed Funds	-	19,592
Derivative Financial Instruments	3,561	1,207
	3,561	20,799
Amounts recognised in profit or loss		
During the year, the following gains/(losses) were recognised in profit or loss:		
	2022 \$'000	2021 \$'000
Fair value gain(loss) on short term managed funds held at FVPL recognised in gain/(loss) on financial instruments Fair value gain on derivative financial instrument at FVPL recognised	(98)	53
in gain/loss on financial instruments	2,353	9,366

#### (a) Market Risk

#### (i) Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar.

Foreign exchange risk arises from commercial transactions, given that the Group's sales revenues are denominated in US dollars and the majority of its operating costs are denominated in Australian dollars, and recognised assets and liabilities denominated in a currency that is not the entity's functional currency.

The risk is measured using sensitivity analysis and cash flow forecasting. The Group's exposure to US dollar denominated foreign currency risk at the reporting date, expressed in Australian dollars, was as follows:

	2022 \$'000	2021 \$'000
Market risk		
Cash and cash equivalents	59,461	131,360
Trade and other receivables	48,293	18,464
Trade and other payables	(773)	56
Net US dollar surplus	106,981	149,880

2,255

9,419

#### Note 2. Financial Risk Management (continued)

#### Group sensitivity

Based on the financial instruments held at 31 December 2022, had the Australian dollar weakened/strengthened by 10% against the US dollar with all other variables held constant, the Group's post tax profit for the financial period would have been \$6.8 million higher / \$8.3 million lower (2021: \$7.5 million higher / \$9.21 million lower), mainly as a result of foreign exchange gains/losses on US dollar denominated cash and cash equivalents, term deposits and receivables as detailed in the above table

#### (ii) Price risk

The Group is exposed to commodity price risk. During current and prior years, the price of iron ore pellets is based on a price index used in the market. At this time, the Group does not manage its iron ore price risk with financial instruments.

Going forward, the Group may consider using financial instruments to manage commodity price risk given exposures to market prices arising from the adoption of index based market pricing mechanisms.

Short term managed funds are exposed to price risk arising from investments held by the fund for which the future prices are uncertain. The investment manager moderates this risk through a careful selection of securities within specified limits. The fund actively maintains a high level of diversification in its holdings, thus potentially reducing the amount of risk in the fund.

#### (iii) Cash flow and fair value interest rate risk

The Group's main interest rate risk arises from cash and cash equivalents, term deposits and short term managed funds.

For short term managed funds, the interest-bearing financial assets in each of the Funds expose it to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The main interest rate risk arises from the Fund's investments in bonds.

As at the reporting date, the Group has no variable rate borrowings outstanding. Borrowings issued at variable rates expose the Group to cash flow interest rate risk. Borrowings issued at fixed rates expose the Group to fair value interest rate risk if the borrowings are carried at fair value. The Group's fixed rate borrowings are carried at amortised cost.

The Group analyses its interest rate exposure on a dynamic basis. Various scenarios are simulated taking into consideration refinancing, renewal of existing positions, alternative financing and hedging.

Based on these scenarios, the Group calculates the impact on profit and loss of a defined interest rate shift. No financial instruments are used to manage interest rate risk.

#### (b) Credit Risk

Credit risk is managed on a Group basis. Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transactions.

The Group is exposed to a concentration of risk with sales of iron ore being made to a limited number of customers. The maximum exposure to credit risk at the reporting date is limited to the carrying value of trade receivables, cash and cash equivalents and deposits with banks and financial institutions. As at 31 December 2022, there are \$0.18m in trade receivables (2021 \$0.18m) that are past due. The other classes within trade and other receivables do not contain impaired assets and are not past due.

#### (c) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Group manages liquidity risk by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

#### Note 2. Financial Risk Management (continued)

Maturities of financial liabilities

The table below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period as at the reporting date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

2022 - Consolidated	Less	6-12	Between	Between	Over	Total	Carrying
	than 6 months	months	1 and 2	2 and 5	Evers	contractual cash flows	amount liabilities
	\$'000	\$'000	years \$'000	years \$'000	\$'000	\$'000	\$'000
	Ψ 000	Ψ 000	Ψ 000	Ψ 000	ΨΟΟΟ	ΨΟΟΟ	Ψ 000
Non-derivatives							
Trade and other payables	67,723	-	-	-	-	-	67,723

Derivatives							
Trading derivatives	955	212	_	_	-	1,207	1,207
Total derivatives	955	212	_	_	_	1,207	1,207

#### (d) Capital Risk Management

When managing capital, the Group's objective is to safeguard the ability to continue as a going concern so that the Group continues to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

Management is constantly reviewing and adjusting, where necessary, the capital structure. This involves the use of corporate forecasting models which enable analysis of the Group's financial position including cash flow forecasts to determine future capital management requirements. To ensure sufficient funding, a range of assumptions are modelled.

#### (e) Derivatives

The Group uses derivative financial instruments, such as foreign currency and commodity options to hedge its foreign currency risks and commodity price risks, respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value using valuation techniques which employs the use of market observable inputs. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

#### Classification of derivatives

Derivatives are classified as held for trading and accounted for at fair value through profit or loss. They are presented as current assets or liabilities if they are expected to be settled within 12 months after the end of the reporting period.

The Group has the following derivative financial instruments:

#### Note 2. Financial Risk Management (continued)

	2022 \$'000	2021 \$'000
Electricity fixed forward	3,548	500
Diesel commodity swap	· -	461
Foreign currency options	13	246
Derivative financial instruments	3,561	1,207

#### (f) Recognised fair value measurements

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its financial instruments into the three levels prescribed under the accounting standards.

**Level 1:** The fair value of financial instruments traded in active markets (such as publicly traded derivatives and equity securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in level 1.

**Level 2:** The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

**Level 3:** If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. Specific valuation techniques used to value the derivative financial instruments mainly include determining the fair value of forward contracts using forward rates at the balance sheet date provided by the dealers.

The following table presents the group's assets and liabilities measured and recognised at fair value at 31 December 2022 and 31 December 2021.

#### 2022

2022	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000
Financial Assets				
Short Term Managed Funds	-	-	-	-
Derivative financial Instruments	-	3,561	-	3,561
Trade receivables – embedded derivative		7,698	-	7,698
	-	11,259	-	11,259
2021	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000
Financial Assets				
Short-term managed funds	-	19,592	-	19,592
Trade receivables – embedded derivative	-	5,177		5,177
Financial liabilities				
Derivatives financial instruments	-	1,207	-	1,207
		25,976	-	25,976

#### Note 3. Critical Accounting Estimates and Judgements

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. There are no critical accounting judgements, estimates and assumptions that are likely to affect the current or future financial years.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

#### (a) Net realisable value of inventories

The Group reviews the carrying value of its inventories at each reporting date to ensure that the cost does not exceed net realisable value. Estimates of net realisable value include a number of assumptions, including commodity price expectations, foreign exchange rates and costs to complete inventories to a saleable product. As at 31 December 2022 the net realisable value exceeded cost for all significant inventory balances.

#### (b) Impairment of property, plant and equipment and mine properties and development

Where there is an indication of a possible impairment, a formal estimate of the recoverable amount of each Cash Generating Unit (CGU) is made, which is deemed to be the higher of a cash generating unit's fair value less costs of disposal and its value in use.

Significant judgements and assumptions are required in making estimates of Fair Value. The CGU valuations are subject to variability in key assumptions including, but not limited to, long-term iron ore pellet prices, currency exchange rates, and discount rates. An adverse change in one or more of the assumptions used to estimate Fair Value could result in a reduction in a CGU's recoverable value. This could lead to the recognition of impairment losses in the future. At 31 December 2022, the Group determined that there were no indicators of impairment.

To identify any indications of impairment, Management considers both external and internal sources as summarised below:

#### **External Sources**

- (i) The carrying amount of the net assets more than its market capitalisation
- (ii) Market interest rate have increased during the period
- (iii) Significant changes with an adverse effect on the entity have taken place or will take place in the future
- (iv) Observable indications that an asset market value has declined significantly more than that would be expected because of the passage of time and used

#### Internal Sources

- (i) Significant changes have taken place or expected to take place in the near future which an asset is used or expected to be used
- (ii) Internal reporting suggests that the economic performance of an asset is or will be worse than expected
- (iii) Obsolescence or physical damage of an asset

#### **Note 3. Critical Accounting Estimates and Judgements (continued)**

#### (c) Stripping costs in the production phase of a surface mine (Interpretation 20)

The application of Interpretation 20 requires management judgement in determining whether a surface mine is in the production phase and whether the benefits of production stripping activities will be realised in the form of inventory produced through improved access to ore.

Judgement is also applied in identifying the component of the ore body and the manner in which stripping costs are capitalised and amortised. There are a number of uncertainties inherent in identifying components of the ore body and the inputs to the relevant production methods for capitalising and amortising stripping costs and these assumptions may change significantly when new information becomes available. Such changes could impact on capitalisation and amortisation rates for capitalised stripping costs and deferred stripping asset values.

#### (d) Determination of mineral resources and ore reserves

Mineral resources and ore reserves are based on information compiled by a Competent Person as defined in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the JORC 2012 code). There are numerous uncertainties inherent in estimating ore reserves and assumptions that are valid at the time of estimation may change significantly when new information becomes available. Changes in forecast prices of commodities, exchange rates, production costs or recovery rates may change the economic status of ore reserves and may, ultimately, result in the reserves being restated. Such changes in reserves could impact on depreciation and amortisation rates, asset carrying values and provisions for rehabilitation.

#### (e) Taxation

The Group's accounting policy for taxation requires management judgment in relation to the application of income tax legislation. There are many transactions and calculations undertaken during the ordinary course of business where the ultimate tax determination is uncertain. The Group recognises liabilities for tax, and if appropriate taxation investigation or audit issues, based on whether tax will be due and payable. Where the taxation outcome of such matters is different from the amount initially recorded, such difference will impact the current and deferred tax positions in the period in which the assessment is made.

The Group merged its multiple tax consolidated groups on 6 January 2011 which has impacted the carrying amount of deferred tax assets and deferred tax liabilities recognised on the balance sheet. Management has used judgment in the application of income tax legislation on accounting for this tax consolidation. These judgments are based on management's interpretation of the income tax legislation applicable at the time of the consolidation.

In addition, certain deferred tax assets for deductible temporary differences have been recognised. In recognising these deferred tax assets assumptions have been made regarding the Group's ability to generate future taxable profits. There is an inherent risk and uncertainty in applying these judgments and a possibility that changes in legislation or forecasts will impact upon the carrying amount of deferred tax assets and deferred tax liabilities recognised on the balance sheet.

#### Note 3. Critical Accounting Estimates and Judgements (continued)

#### (f) Provision for decommissioning and restoration costs

Decommissioning and restoration costs are a normal consequence of mining, and the majority of this expenditure is incurred at the end of a mine's life. In determining an appropriate level of provision, consideration is given to the expected future costs to be incurred, the timing of these expected future costs (largely dependent on the life of the mine), and the estimated future level of inflation, with reference to analysis performed by internal and external experts.

The ultimate cost of decommissioning and restoration is uncertain and costs can vary in response to many factors including changes to the relevant legal requirements, changes to mine plan, and the emergence of new restoration techniques or experience at other mine sites. The expected timing of expenditure can also change, for example in response to changes in reserves or to production rates.

Certain rehabilitation activities are undertaken as part of the mining operations included in the life of mine plan. Should the life of mine plan be amended in the future to exclude these activities, the provision for rehabilitation would increase correspondingly.

Changes to any of the estimates could result in significant changes to the level of provisioning required, which would in turn impact future financial results. These estimates are reviewed annually and adjusted where necessary to ensure that the most up to date data is used.

#### **Note 4. Segment Information**

#### (a) Description of segments

Operating segments are determined based on the reports reviewed by the Chief Executive Officer, who is the Group's chief operating decision maker in terms of allocating resources and assessing performance.

The Group has two reportable segments:

- (i) Exploration, evaluation, and development of mineral resources and iron ore mining operations; and
- (ii) Development and construction of housing units

The Chief Executive Officer allocates resources and assesses performance, in terms of revenues earned, expenses incurred, and assets employed, on a consolidated basis in a manner consistent with that of the measurement and presentation in the financial statements.

Exploration, evaluation and development projects (including the Southdown project) are not deemed reportable operating segments at this time as the financial performance of these operations is not separately included in the reports provided to the Chief Executive Officer. These projects may become segments in the future.

Segment assets and capital are allocated based on where the assets are located. The consolidated assets of the Group were predominately located in Australia as at 31 December 2022 and 31 December 2021. The total costs incurred during the current and comparative periods to acquire segment assets were also predominately incurred in Australia.

	2022 \$'000	Ore Mining 2021 \$'000	Property De 2022 \$'000	velopment 2021 \$'000	Total 2022 \$'000	Total 2021 \$'000
Revenue from external customers Timing of Revenue Recognition	580,294	775,481	14,261	6,181	594,555	781,622
At a point in time - pellets Over time - freight	521,839 58,455	722,283 53,198	14,261 -	6,181 -	536,100 58,455	728,464 53,198

Note 4. Segment Information (continued)

	2022	2021	2022	2021	2022	2021
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Total Assets	1,098,219	1,095,526	-	24,709	1,098,219	1,120,235
Total Liabilities	194,093	247,891		1,125	194,093	249,016

The following table presents revenues from sales of iron ore based on the geographical location of the port of discharge. **Segment revenues from sale to external customers** 

	2022 \$'000	2021 \$'000
Ore Mining		
Australia	38,520	46,314
China	355,369	551,330
South Korea	167,294	177,837
Malaysia	4,893	-
Turkey	14,218	-
	580,294	775,481
Property Development		
Australia	14,261	6,181
Total Revenue	594,555	781,662

Sales of iron ore products to Jiangsu Shagang International Trade Co., Ltd, a wholly owned subsidiary of Jiangsu Shagang Group, under long-term off-take agreements amounted to \$211.9m / 36.5% of mining revenue (2021: \$216.3m / 27.7%).

Segment assets and capital are allocated based on where the assets are located. The consolidated assets of the Group were predominately located in Australia as at 31 December 2022 and 31 December 2021. The total costs incurred during the current and comparative periods to acquire segment assets were also predominately incurred in Australia.

#### Note 5. Revenue from Operations

	Revenue	2022		Revenue	2021	
	from Contracts with Customers	Other Revenue/ (Loss)	Total Revenues	from Contracts with Customers	Other Revenue/ (Loss)	Total Revenues
From mining operations Sales of iron ore	609,515	(29,221)	580,294	774,293	1,188	775,481
From property development Sales of property	14,261	-	14,261	6,181	-	6,181
	623,776	(29,221)	594,555	780,474	1,188	781,662

Revenue from contracts with provisional pricing is recognised based on the estimated forward prices where available which the Group expects to receive at the end of the quotation period. Where an estimated forward price is not available, spot prices are applied as management's best estimate of the provisional prices. The quotation period exposure is considered to be an embedded derivative and forms part of trade receivables. The subsequent changes in the fair value were recognised in the statement of profit or loss and other comprehensive income as other revenue (loss). Changes in fair value over, and until the end of the quotation period, are estimated by reference to updated forward market prices.

### Note 6. Cost of Sales

	2022 \$'000	2021 \$'000

Total income tax expense	77,091	139,275

#### **Note 11. Income Tax Expense (continued)**

(c) Taxation Losses Unused taxation losses for which no deferred tax asset has been recognised Potential tax benefit @ 30%	5,246 <b>1,574</b>	3,733 <b>1,120</b>
Note 12. Cash and cash equivalents		
	2022 \$'000	2021 \$'000
Cash at bank and in hand	9,074	5,240
Short-term deposits	99,337	438,650
Cash and cash equivalents	108,411	443,890
Cash and cash equivalents as per statement of cash flows	108,411	443,890

Total cash is held in trading accounts or term deposits with major financial institutions under normal terms and conditions appropriate to the operation of the accounts. These deposits earn interest at rates set by these institutions. As at 31 December 2022 the weighted average interest rate on the Australian dollar accounts was 0.47% (31 December 2021: 0.31%) and the weighted average interest rate on the United States dollar accounts was 2.44% (31 December 2021: 1.94%).

#### (a) Risk exposure

The Group's exposure to interest rate risk is discussed in note 2. The maximum exposure to credit risk at the reporting date is the carrying amount of each class of cash and cash equivalents mentioned above.

#### Note 13. Trade and other receivables

	2022 \$'000	2021 \$'000
Trade receivables	48,727	18,822
Security deposits	325	370
Other receivables	8,120	4,429
Prepayments	1,249	498
	58,421	24,119

Trade receivables include provisionally priced receivables relating to sales contracts where the selling price is determined after delivery to the customers, based on the market price at the relevant quotation point stipulated in the contract (note 5 – Revenue). The quotation period exposure is considered to be an embedded derivative and not separated from the entire balance. The entire balance is accounted for as one instrument and measured at fair value.

Trade receivables - embedded derivative due to quotation period exposure is considered as level 2 in fair value hierarchy (note 2).

Security deposits comprises of restricted deposits that are used for monetary backing for performance guarantees.

#### (a) Impaired trade receivables

Information regarding the impairment of trade and other receivables is provided in note 2.

#### b) Foreign exchange and interest rate risk

Information about the Group's exposure to foreign currency risk and interest rate risk in relation to trade and other receivables is provided in note 2.

#### Note 13. Trade and other receivables (continued)

#### (c) Fair value and credit risk

Due to the short-term nature of these receivables, their carrying amount is assumed to be their fair value. The maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of receivables mentioned above. Refer to note 2 for more information on the credit quality of the Group's trade and other receivables.

#### Note 14. Inventories

	2022 \$'000	2021 \$'000
Stores and spares	47,656	34,986
Ore stockpiles	83,155	91,667
Work in progress	2,848	970
Finished goods (at lower of cost and net realisable value)	29,245	22,163
Properties developed for sale	· -	12,215
	162,904	162,001

Ore stockpiles, work in progress, finished goods and stores and spares are valued at the lower of weighted average cost and estimated net realisable value. A credit of \$.4 million in 2022 and a credit of \$45.5 million in 2021 were recognised for the movements in inventories (note 6).

#### Note 15. Receivables

	2022 \$'000	2021 \$'000
Security deposits	8,988	7,984

Non-current security deposits comprise of restricted deposits that are used for monetary backing for performance guarantees.

### (a) Risk exposure

Information about the Group's exposure to credit risk, foreign exchange risk and interest rate risk in relation to security deposits is provided in note 2. The maximum exposure to credit risk at the reporting date is the carrying amount of each class of receivables mentioned above.

Note 16. Property, plant and equipment

	Land and Building \$'000	Plant and Equipment \$'000	Computer Equipment \$'000	Total \$'000

### (a) Assets under construction

The carrying amounts of the assets disclosed above includes expenditure of \$104.1 million (2021: \$68.2 million) recognised in relation to property, plant and equipment which is in the course of construction.

### Note 17. Right-of-use assets

This note provides information for leases where the group is a lessee.

### (i) Amounts recognised in the balance sheet

The balance sheet shows the following amounts relating to leases:

### Note 17. Right-of-use assets (continued)

The balance sheet shows the following amounts relating to leases:	2022 \$'000	2021 \$'000
Right-of-use assets		
Land and buildings	189	255
Plant and equipment	6,764	18,285
	6,953	18,540
Lease liabilities		
Current	4,284	16,920
Non-current	2,198	535
Total lease liabilities	6,482	17,455

Additions to the right-of-use assets during the 2022 financial year were \$5,904,363 (2021 - \$18,268,097)

The total cash outflow from repayment of leases in 2022 excluding interest repayment was \$6,670,320 (2021 - \$3,221,573).

### (ii) Amounts recognised in the statement of profit or loss

The statement of profit or loss shows the following amounts relating to leases:

	2022	2021
	\$'000	\$'000
Depreciation charge of right of use assets		
Land and buildings	(60)	(75)
Plant and equipment	(3,193)	(1,964)
	(3,253)	(2,039)
Interest expense (included in finance cost)	1,047	304
Expense relating to short-term leases (included in cost of sales)	297	315
	2022 \$'000	2021 \$'000
Mine properties and development (at cost)	664,105	670,898
Accumulated amortisation and impairment	(500,997)	(491,276)
Net book amount	163,108	179,622
Deferred stripping costs (net book amount)	197,844	82,755
Total mine properties and developments	360,952	262,377

#### Note 18. Mine properties and development (continued)

Movements in mine properties and development are set out below:	2022 \$'000	2021 \$'000
Mine properties and development		
Opening net book amount	179,622	170,584
Current year expenditure capitalised	623	1,134
Change in rehabilitation estimate	16,994	21,913
Change in discount rate	(26,132)	(4,537)
Amortisation Expense	(8,982)	(9,472)
Transfer from PPE	983	<u>-</u>
Closing net book amount	163,108	179,622
Deferred stripping costs		
Opening net book amount	82,755	98,713
Current year expenditure capitalised	136,222	38,941
Amortisation expense	(21,133)	(54,899)
Closing net book amount	197,844	82,755
Note 19. Trade and other payables		
	2022	2021
	\$'000	\$'000
Trade payables	45,003	36,613
Contract Liabilities	2,662	3,793
Tax payable	16,184	79,110
Other payables	3,874	1,320
	67,723	120,836

#### (a) Risk exposure

Trade payables are non-interest bearing and are normally settled on repayment terms between 7 and 30 days. Information about the Group's exposure to foreign exchange risk is provided in note 2.

#### Note 20. Provisions

Provisions (Current)	2022 \$'000	2021 \$'000
Leave Obligations	17,793	17,630
Employee benefits	2,891	3,093
Decommissioning and restoration	1,323	1,487
Property settlement related provision	-	80
	22,007	22,290

The leave obligations cover the group's liabilities for long service leave and annual leave which are classified as either current or non-current benefits. The current portion of this liability includes all of the accrued annual leave, the unconditional entitlements to long service leave where employees have completed the required period of service and also for those employees that are entitled to pro-rata payments in certain circumstances. The entire amount of the provision of \$17.8 million (2021 \$17.6 million) is presented as current, since the group does not have an unconditional right to defer settlement for any of these obligations. However, based on past experience, the group does not expect all employees to take the full amount of accrued leave or require payment within the next 12 months.

### Note 20. Provisions (continued)

The following amounts reflect leave that is not expected to be taken or paid within the next 12 months.

	2022 \$'000	2021 \$'000
Current leave obligations expected to be settled after 12 months	8,894	10,476
Movements in provision for decommissioning and restoration (current) are set out below	2022 \$'000	2021 \$'000
Balance at beginning of year Payments Transfers from non-current provisions	1,487 (138) (26)	5,950 (177) (4,286)
Balance at the end of the year	1,323	1,487
Provisions (Non-Current)	2022 \$'000	2021 \$'000
Leave obligations Employee benefits Decommissioning and restoration	2,598 181 77,586	2,895 305 85,235
	80,365	88,435
Movements in provision for decommissioning and restoration are set out below	2022 \$'000	2021 \$'000
Balance at beginning of the year Change in estimate Unwinding of discount Transfers to current provisions Rehabilitation work completed	85,235 (8,630) 1,911 26 (956)	68,671 11,422 906 4,236
	77,586	85,235

The main component of the provision for decommissioning and restoration costs is for the Group's obligation to rehabilitate the Savage River and Port Latta sites for the disturbance caused by its operations. The rehabilitation provision also includes an obligation under the Tasmanian Goldamere Pty Ltd Act 1996 to repay the Tasmanian Government for part of the purchase of the mine through expenditure on remediation.

### Note 21. Deferred tax assets (liabilities)

	2022 \$'000	2021 \$'000
The balance comprises temporary differences attributable to:		
Deferred Tax Assets		
Property, plant and equipment	16,572	17,972
Mine properties and development	-	816
Decommissioning and restoration	21,954	24,224
Employee benefits	7,039	7,174
Foreign exchange	353	-
Trade Receivables	56	53
Prepayments	-	1
Total deferred tax assets	45,974	50,240
Deferred tax liabilities		
Mine properties and development	(55,912)	-
Foreign exchange	-	(1,104)
Inventory	(6,368)	(5,133)
Derivatives	(1,068)	(363)
Trade Payables	(141)	(295)
Prepayments	` (1)	
Total deferred tax liabilities	(63,490)	(6,895)
Total net deferred tax assets (liabilities)	(17,516)	43,345

#### Note 22. Share-based payment

In May 2022 (various dates) Grange Resources Limited (Parent Company) granted performance rights in three tranches and to be settled by issuance of shares to three key management personnel. Each right is entitled to a one equity share with a vesting date of 31 December 2024.

Tranche 1 requires a total share return (TSR) hurdle while Tranche 2 and Tranche 3 requires a series of non-market-based business objectives.

The performance rights granted were determined to be an equity settled shared-based payment transaction. The fair value at grant date for tranche 1 is estimated using a Monte Carlo model, adjusted to take account of the Shareholder Return ("TSR") target required for the Performance Rights to vest while for tranche 2 and 3 using Black Scholes Option Pricing. The fair value at the grant date was estimated using the following assumptions:

The life of the performance rights (years)	2.6
Share price at grant dates	\$1.220, \$1.550, \$1.585
Expected volatility	55%
Dividend yield	3.3%
Risk free interest rates	2.9%,2.6%
TSR at measurement dates (tranche 1 only and relative to index)	61.6%, 96.7%, 98.8%

The fair values of the performance rights at grant date are tranche 1 (\$128,331), tranche 2 (\$157,332) and tranche 3 (\$70,600) and these are amortised over the life of the performance rights. The Group has recognised employee benefits expense of \$53,404.

#### Note 23. Contributed equity

#### **Ordinary shares**

Ordinary shares entitle the holder to participate in dividends and the proceeds of winding up of the Company in proportion to the number of and amounts paid on the shares held. Ordinary shares entitle their holder to one vote per share, either in person or by proxy, at a meeting of the Company. Ordinary shares have no par value and the Company does not have a limited amount of authorised share capital.

(a) Movements in ordinary share capital	Number of Shares	\$'000
Balance at 1 Jan 2022 / 31 Dec 2022	1,157,338,698	331,513
Note 24. Retained earnings		
Retained earnings attributable to owners of Grange Resources		
	2022 \$'000	2021 \$'000
Retained earnings Movements in retained earnings were as follows		
Balance at the beginning of the year  Profit for the year	541,979 171,735	381,747 322,260
Dividends paid	(138,881)	(162,028)
Balance at the end of the year	574,833	541,979
Note 25. Dividends		
	2022 \$'000	2021 \$'000
Fully franked interim dividend for half year ended 30 June 2022 - 2.0 cents per share Fully franked final dividend for the year ended 31 December 2021 - 10.0 cents per share	23,147 115,734	-
Fully franked special dividend for year ended 31 December 2021 - 10.0 cents per share	-	115,734
Fully franked interim dividend for half year ended 30 June 2021 - 2.0 cents per share Fully franked final dividend for the year ended 31 December 2020 - 2.0 cents per share	-	23,147 23,147
	138,881	162,028

Since the end of the financial year the directors have recommended the payment of a 2.0 cent final dividend of \$23.1 million. This represents a total of \$46.3 million (4.0 cents per share) fully franked dividend for the year-end 31 December 2022. The final dividend was declared NIL conduit foreign income and will be paid on 28 March 2023.

#### Franked Dividends

The final dividends recommended after 31 December 2022 will be fully franked out of existing franking credits, or out of franking credits arising from the payment of income tax in the year ending 31 December 2022.

manning or cance among ment and paryment or meeting tark in the year entaining or the		
	31 December 2022 \$'000	31 December 2021 \$'000
Franking credits available for subsequent reporting periods Based on a tax rate of 30% (2021 - 30%)	87,262	126,937

The above amounts are calculated from the balance of the franking account as at the end of the reporting period, adjusted for franking credits and debits that will arise from the settlement of liabilities or receivables for income tax and dividends after the end of the year.

#### Note 26. Carrying value of non-current assets

At each reporting date, the Group assesses whether there is any indication that an asset may be impaired. The Group considers both internal and external factors when reviewing for indicators of impairment (Note 3(b)).

At 31 December 2022, the Group determined that there were no indicators of impairment for Property Plant and Equipment, Mine Property & Development and Right of Use of Assets due to improved market capitalisation, strong spot and consensus forecast iron ore prices, foreign exchange rates, reserves and resources, and asset performance at 31 December 2022.

In addition to this, the Group is currently undertaking an underground project to extend the life of mine, reduce the operating costs and minimise the future capital expenditures.

#### Note 27. Remuneration of auditors

During the period the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non-related audit firms.

	2022 \$'000	2021 \$'000
Assurance Services		
PwC Australia		
Audit and review of financial reports	239	313
Other assurance services	27	102
Network firms of PwC Australia	18	17
	284	432
Non-Assurance Services		
PwC Australia		
Taxation compliance services	-	8
Total remuneration paid	284	440

### Note 28. Commitments and Contingencies

### (a) Tenement expenditure commitments

In order to maintain the mining and exploration tenements in which the Group is involved, the Group is committed to meet conditions under which the tenements were granted. If the Group continues to hold those tenements, the minimum expenditure requirements (including interests in joint venture arrangements) will be approximately:

	2022 \$'000	2021 \$'000
Within one year	386	492
Less than one year but not later than 5 years	1,584	1,567
Later than 5 years	2,482	2,445
	4,452	4,504

#### Note 28. Commitments and Contingencies (continued)

#### (b) Capital expenditure commitments

Capital expenditure obligations at the end of the reporting period but not recognised as liabilities are as follows:

	2022 \$'000	2021 \$'000
Within one year	46,967	17,739
Less than one year but not later than 5 years	-	9,218
	46,967	26,957

### (c) Contractual operating expenditure commitments

Obligations to external parties which arise with respect to legal supply contracts made by the company (other than lease agreements).

	2022 \$'000	2021 \$'000
Within one year	55,353	26,177
After one year but not more than 5 years	15,690	26,909
	71,043	53,086

#### (d) Bank Guarantees

Bank guarantees have been provided on the Group's behalf to secure, on demand by the Minister for Mines and Energy for the State of Queensland, any sum to a maximum aggregate amount of \$2,012,963 (2021: \$2,012,963), in relation to the rehabilitation of the Highway Reward project.

A Bank guarantee has been provided by Grange Resources (Tasmania) Pty Ltd, held by the Tasmanian Government, as required under Environmental Management and Pollution Control Act 1994 (EMPCA) for the amount of \$3,174,542

A Bank guarantee has been provided by Grange Resources (Tasmania) Pty Ltd, held by the National Australia Bank, as required under the Goldamere Agreement and applicable Deeds of Variation, for the amount of \$2,800,000 (2021: \$2,800,000). This amount is a guarantee against the purchase price outstanding with the Tasmanian government as specified in the Goldamere Agreement.

A Bank guarantee has been provided by Grange Resources Limited, held by the National Australia Bank, as required under the Capacity Auction Agreement governed by the Australian Energy Market Operator Limited ("**AEMO**") for the amount of \$1,000,000 (2021: Nil).

No material losses are anticipated in respect to the above bank guarantees and the rehabilitation provisions include these amounts.

#### (e) Contingent Assets and Liabilities

The Group did not have any material contingent assets or liabilities at the Balance Sheet Date.

#### Note 29. Related party transactions

#### (a) Ultimate Parent

Grange Resources Limited (Grange) is the ultimate Australian parent company.

### Note 29. Related party transactions (continued)

#### (b) Subsidiaries

Interests in subsidiaries are set out in note 32.

#### (c) Key management personnel compensation

	2022 \$	2021 \$
Short term employee benefits	1,666,986	1,667,495
Post-employment benefits	135,180	124,962
Long-term benefits	52,591	49,990
Long-term incentives	202,870	198,398
	2,057,627	2,040,845

### (d) Transactions with related parties

During the year the following transactions occurred with related parties:

2022 2021

Sales of iron ore products

211,922,470 216,292,463

Sales of iron ore products to Jiangsu Shagang International Trade Co., Ltd, a wholly owned subsidiary of Jiangsu Shagang Group, under long-term off-take agreements.

During the year, 867,501 dry metric tonnes of iron ore products were sold to Shagang in accordance with the terms of the long term off-take agreements (2022 Contract Year (1 April 2021 to 31 March 2022): 707,049) (2021 contract year (1 April 2020 to 31 March 2021): 860,542 dmt).

### (e) Outstanding balances arising from transactions with related parties

The following balances are outstanding at the end of the reporting period in relation to transactions with related parties:

	2022 \$	2021 \$
Trade receivables (sales of iron ore products)		
Pellets	15,241,644	19,095,808
Other	<del>-</del>	(62,961)
	15.241.644	19.032.847

Amounts outstanding under the long term off-take agreement with Shagang are unsecured whereas amounts outstanding in respect of spot sales are secured against an irrevocable letter of credit. All outstanding balances will be settled in cash. The credit balance of the receivables in the current year represents the final price adjustments due to the quotation periods and final discharge port results.

There is no allowance account for impaired receivables in relation to any outstanding balances with related parties, and no expense has been recognised during the year in respect of impaired receivables due from related parties (2021: Nil).

#### Note 29. Related party transactions (continued)

#### Long term off-take agreement

Grange Resources (Tasmania) Pty Ltd (Grange Tasmania) is party to a long term off-take agreement (Pellets and Chips) with Jiangsu Shagang International Trade Co. Ltd (Shagang), a wholly owned subsidiary of Jiangsu Shagang Group Co. Ltd, who, as at 24 February 2023, holds 47.93% (26 February 2022: 47.93%) of the issued ordinary shares of Grange.

#### Pellets

The key terms of the agreement with Shagang, as advised to the ASX on 23 April 2021, are as follows:

- (i) The sale of 1 million dry metric tonnes of iron ore pellets per annum until 2032.
- (ii) The price for the iron ore pellets will be based on a price index used by other market participants as agreed by the parties having regard to:
  - a) seaborne iron ore supply and demand conditions
  - b) available published price benchmarks for iron ore; and
  - c) product quality differentials.

Transactions between Shagang and Grange must be approved by non-associated shareholders of Grange, or approved by the Grange independent directors.

#### Receivable from and payable to related parties

There were no trade receivables from or trade payables to related parties at the current and previous reporting date.

#### Loans to/from related parties

There were no loans to or from related parties at the current and previous reporting date.

#### Note 30. Subsidiaries

The consolidated financial statements incorporate the assets, liabilities and results of the following subsidiaries in accordance with the accounting policy described in note 1.

	Percentaç	ge of equity
	interest held by	the Group
	2022	2021
Name	%	%
Ever Green Resources Co., Limited (1)	100	100

<sup>(1)</sup> Ever Green Resources Co., Limited is incorporated in Hong Kong, and registered as a foreign company under the Corporations Act 2001.

<sup>&</sup>lt;sup>(2)</sup> On 13 February 2023 Grange ROC Property Pty Ltd was deregistered.

#### Note 31. Interest in Joint Operations

Name of Joint Operation	2022	% Interest 2021
Southdown Magnetite and Associated Pellet Project(s) – Iron Ore	70.00	70.00
Reward - Copper / Gold	31.15	31.15
Highway – Copper	30.00	30.00
Reward Deeps / Conviction - Copper	30.00	30.00
Mt Windsor Exploration - Gold / Base Metals	30.00	30.00
Durack / Wembley – Exploration Gold	15.00	15.00

The joint operations are not separate legal entities. They are contractual arrangements between the participants for the sharing of costs and output and do not in themselves generate revenue and profit.

Mt Windsor Exploration is a joint venture between BML Holdings Pty Limited, a subsidiary of Grange Resources Limited, and Thalanga Copper Mines Pty Ltd. The joint venture was engaged in ore mining and is now being rehabilitated for future lease relinquishment. The principal place of business of the joint venture is at 1 Penghana Road, Queenstown, Tasmania, 7326.

Southdown Magnetite and Associated Pellet Project(s) is a joint venture between Grange Resources Limited and SRT Australia Pty Ltd (SRT). The joint venture proposes to mine and export premium iron ore pellets and concentrates. The principal place of business of the joint venture is at 34a Alexander Street, Burnie, Tasmania, 7320.

Grange Resources Limited has entered into a binding agreement with its joint venture partner, SRT Australia Pty Ltd ("SRT"), to re-acquire SRT's 30% interest in the Southdown Magnetite Project. Upon completion of the transaction, Grange will hold 100% ownership in the Southdown Project.

Condition precedents includes Australian Foreign Investment Review Board (FIRB) approval, ministerial consent, and no breach of seller warranty.

Either party may terminate the SPA if a condition precedent has not been satisfied or waive by the cut-off date. The cut-off date for satisfaction of conditions precedent is 180 days of the date of agreement. SRT can extend cut-off date for FIRB approval condition by a further 180 days.

The binding agreement also includes:

- Grange to provides SRT with a cash amount, right to future off-take and cancellation of future royalty obligations.
- Grange has also entered into an off-take rights agreement with Sojitz Corporation (Sojitz). This provides Sojitz with
  rights to acquire up to 30% of future Southdown Project production at market prices for a period of 20 years plus options
  for additional 20 years.
- Sojitz has agreed to provide confirmation of its intention to purchase products from the Southdown Project to support financing for its development.

## Note 32. Reconciliation of profit after income tax to net cash inflow from operating activities

Profit for the year	787,207	259,972
Total comprehensive income for the year	787,207	259,972

#### (b) Contingent liabilities of the parent entity

#### Other contingent liabilities

Pursuant to the terms of an agreement dated 21 November 2003, under which the Company purchased certain tenements comprising the Southdown project, the Company is required to make a further payment of \$1,000,000 to MedAire, Inc upon commencement of commercial mining operations from those tenements.

### Note 35. Events Occurring After the Reporting Period

Since the end of the financial year the directors have recommended the payment of a 2.0 cent per share, final dividend of \$23.1 million.

There were no other matters or circumstances arising since 31 December 2022 that has significantly affected, or may significantly affect:

- i) The Group's operations in future years; or
- ii) The results of those operations in future financial years; or
- iii) The Group's state of affairs in future financial years.

#### Grange Resources Limited Directors' declaration 31 December 2022

#### In the directors' opinion:

- the attached financial statements and notes comply with the Corporations Act 2001, the Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements;
- the attached financial statements and notes comply with International Financial Reporting Standards as issued by the International Accounting Standards Board as described in note 1 to the financial statements;
- the attached financial statements and notes give a true and fair view of the Group's financial position as at 31 December 2022 and of its performance for the financial year ended on that date; and
- there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

The directors have been given the declarations required by section 295A of the Corporations Act 2001.

Signed in accordance with a resolution of directors made pursuant to section 295(5)(a) of the Corporations Act 2001.

On behalf of the directors

Michelle Li

Chairperson of the Board of Directors

24 February 2023

## Independent auditor's report

To the members of Grange Resources Limited

### Report on the audit of the financial report

### Our opinion

In our opinion:

The accompanying financial report of Grange Resources Limited (the Company) and its controlled entities (together the Group) is in accordance with the *Corporations Act 2001*, including:

- (a) giving a true and fair view of the Group's financial position as at 31 December 2022 and of its financial performance for the year then ended
- (b) complying with Australian Accounting Standards and the Corporations Regulations 2001.

#### What we have audited

The Group financial report comprises:

- the consolidated statement of financial position as at 31 December 2022
- the consolidated statement of comprehensive income for the year then ended
- the consolidated statement of changes in equity for the year then ended
- the consolidated statement of cash flows for the year then ended
- the notes to the consolidated financial statements, which include significant accounting policies and other explanatory information
- the directors' declaration.

#### **Basis for opinion**

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial report* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional & Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

### Our audit approach

An audit is designed to provide reasonable assurance about whether the financial report is free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

PricewaterhouseCoopers, ABN 52 780 433 757 2 Riverside Quay, SOUTHBANK VIC 3006, GPO Box 1331, MELBOURNE VIC 3001 T: 61 3 8603 1000, F: 61 3 8603 1999

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial report as a whole, taking into account the geographic and management structure of the Group, its accounting processes and controls and the industry in which it operates.

#### Materiality

- For the purpose of our audit we used overall Group materiality of \$15.3 million, which represents approximately 5% of the Group's average profit before tax over the past 3 years.
- We applied this threshold, together with qualitative considerations, to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements on the financial report as a whole.
- We chose Group average profit before tax because, in our view, it is the benchmark against which the performance of the Group is most commonly measured. Due to fluctuations in profit and loss from year to year, we chose a three year average.
- We utilised a 5% threshold based on our professional judgement, noting it is within the range of commonly acceptable thresholds.

#### Audit scope

 Our audit focused on where the Group made subjective judgements; for example, significant accounting estimates involving assumptions and inherently uncertain future events.

### Key audit matters

- Amongst other relevant topics, we communicated the following key audit matters to the Audit and Risk Committee:
  - Assessing the carrying value of mining assets
  - Accounting for the cost of rehabilitation
- These are further described in the Key audit matters section of our report

### **Key audit matters**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report for the current period. The key audit matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Further, any commentary on the outcomes of a particular audit procedure is made in that context. We communicated the key audit matters to the Audit and Risk Committee.

#### Key audit matter

## How our audit addressed the key audit matter

# Assessing the carrying value of mining assets (Refer to note 16, 17 and 18)

At 31 December 2022, the Group had carrying values for property, plant and equipment of \$197.8 million, mine properties and development of \$361.0 million and right of use assets of \$6.9 million (the 'mining assets').

In line with AASB 116 Property Plant and Equipment, the Group is required to assess whether there is any indication that an asset may be impaired at each reporting period.

At 31 December 2022, the Group concluded that there were no indicators of impairment in relation to the carrying value of mining assets.

The assessment for the carrying value of mining assets was a key audit matter due to the financial significance of the balances.

To assess the carrying value of mining assets we performed the following procedures, amongst others:

- Evaluated the Group's assessment of whether there were any indicators of mining asset impairment, including consideration of iron ore prices, foreign exchange rates, reserves and resources and asset performance over the year.
- Compared the value of net assets of the Group at year ended 31 December 2022 to the market capitalisation.

# Accounting for the cost of rehabilitation (Refer to note 20)

The main component of the provision for decommissioning and restoration costs is for the Group's obligation to rehabilitate the Savage River and Port Latta sites for the disturbance caused by its operations. The rehabilitation provision also includes an obligation under the Tasmanian Goldamere Pty Ltd Act 1996 to repay the Tasmanian Government for part of the purchase of the mine through expenditure on remediation.

The net present value of the cost of rehabilitation is recorded as a provision of \$77.6 million (non-current) and \$1.3 million (current), for a total of \$78.9 million.

Given the financial significance of this balance and the judgments involved in accounting for the cost of rehabilitation, this was a key audit matter.

To assess the accounting for the cost of rehabilitation, we performed the following procedures, amongst others:

- Obtained the Group's calculation of the rehabilitation provision. We checked the mathematical accuracy on a sample of calculations and whether the timing of the cash flows in the rehabilitation models was consistent with the life of mine plan.
- Assessed whether the discount rates used in the rehabilitation models were reasonable by comparing them to market data.
- Where external and internal experts were used by the Group to estimate remediation costs, we assessed our ability to use their estimates, considering their objectivity, competency and capability and assessing that the scope of work they performed was appropriate for the purposes of the estimate.
- We compared the Group's significant assumptions on rehabilitation costs to other similar costs in the business or external data where appropriate.

#### Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report for the year ended 31 December 2022, but does not include the financial report and our auditor's report thereon. Prior to the date of this auditor's report, the other

information we obtained included the Directors' Report and the Corporate Governance Statement . We expect the remaining other information to be made available to us after the date of this auditor's report.

Our opinion on the financial report does not cover the other information and we do not and will not express an opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the other information not yet received, if we conclude that there is a material misstatement therein, we are required to communicate the matter to the directors and use our professional judgement to determine the appropriate action to take.

### Responsibilities of the directors for the financial report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

### Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at:

https://www.auasb.gov.au/admin/file/content102/c3/ar1\_2020.pdf. This description forms part of our auditor's report.

### Report on the remuneration report

### Our opinion on the remuneration report

We have audited the remuneration report included in pages 11 to 20 of the directors' report for the year ended 31 December 2022.

In our opinion, the remuneration report of Grange Resources Limited for the year ended 31 December 2022 complies with section 300A of the *Corporations Act 2001*.

### Responsibilities

The directors of the Company are responsible for the preparation and presentation of the remuneration report in accordance with section 300A of *the Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.
